INDEX

For Volume 63

AUTHOR AND SUBJECT INDEX. Junior authorship is indicated by page numbers in parentheses. Page numbers of illustrations are in boldface. Pages of errata are in brackets. A special listing is made of "new diseases, species, and varieties."

Abawi, G. S., 199
Abdul-Baki, A. A., 231
Abies fraseri, salt injury to, 200
Abney, T. S., (796)
Acer
  rubrum
    extractable phenols in healthy & decayed wood of, **167**
    Verticillium wilt of, tolerance to, 673
    wood decay related to N, 200
  saccharum
    Armillaria mellea on, defoliation relation, 209
    extractable phenols in healthy & decayed wood of, 167
    Fusarium canker epidemiology, 367
    leaf necrosis of, relation to elements in soil & leaves, in Ontario, 1426
Adams, R. E., (803), (805)
Adlerz, W. C., (443)
aerobiology
  Helminthosporium maydis, spore dispersal in, 1252
  rusts & mildew on wheat, vertical spore concentrations, 211
aflatoxin (see **toxin**)
African cereal streak, new disease in East Africa, 1407, **1408**, **1409**
Agaricus bisporus
  Aphelenchoides composticola on, control of, 1455
  Verticillium disease of, occurrence in steam-treated soil, 1368, **1372**
Agrios, G. N., (203), (206), (209), (1483)
Agrobacterium tumefaciens, RNA polymerase from, 206
Agrostis palustris, Ustilago striiformis on, control by apical dominance, 146
Aharoni, Y., 544
air pollution (see **pollution, air-**)
Akai, S., (443), (448)
Albersheim, P., (625)
Albizzia julibrissin
  Fusarium oxysporum perniciosum on, lenticellar sporodochia in, 806
  Fusarium wilt of, in greenhouse & field, 804
Albregts, E. E., (419), (533), (862), (938)
Alconero, R., 120, 377
Alcorn, S. M., (352), (485)
Aldwinckle, H. S., 199
Alexander, A. F., (540)
Alexander, S. A., 801
alfalfa
  Ascochyta imperfecta on, glycosidase & flavonoids in, 739
  bacteria of, associated with root rot & wilt, 207
  bacterial leaf spot of, role of wind-blown soil in epidemiology of, 1417
  Corynebacterium insidiosum on, varietal differences to, 760
  Phytophthora megasperma on
    detection in Wisconsin fields, 1374
    resistance to, screening method for, 1185, 1216
  Pythium aphanidermatum on, role of soil water, 1496
  saponin effect on pathogen of, 204
  volatile compounds from, effect on Sclerotium rolfsii, 359, **360**
alfalfa dwarf, rickettsia related to, heat therapy for, 341
alfalfa mosaic virus, thiouracil-induced changes in, 1235
Alfieri, S. A., Jr., (445)
Allen, R. M., 1214
Allison, A. V., 1214
Allison, D. W., (840)
Allium cepa (see **onion**)
Alm, K., (109)
almond, benomyl & methyl benzimidazolecarbamate for disease control in, 959, **960**
Alternanthera philoxeroides, virus-like stunting disease of, in Florida, 443
Alternaria
  alternata
    on tobacco
      effect on growth, 495
      lesion development & sporulation in, 803
      resistance to, 806
    on wheat, black point disease of, 1220, **1221**
  longipes, conidium morphology in, stabilization of, 191
  porri, on onion leaves, appressorium formation, 443
  solani
    on potato, resistance affected by alkaloids, 303
    sporulation of, metabolic inhibitor relation, 176, **179**
  tenuis, tentoxin from, effect on stomata in bean, 1077
  tenuissima
    on highbush blueberry, new leaf spot disease of, 1395
    strawberry fruit rot caused by, 938
Amanita rubescens, on pine, mycorrhiza formation in, 805
American Phytopathological Society
  author's guide for manuscript preparation, 1
  award of distinction, 5
  division abstracts
    Caribbean, 1435
    Northeastern, 199
    Pacific, 1214
    Potomac, 801
    Southern, 440
  fellows, 7
  Ruth Allen award, 6
  symposia
    chemical control of plant disease in the tropics, 1441
    education, opportunities in Latin America, 1436
    epidemiology of diseases in the tropics, 1446
    tropical plant pathology, 1436
    water stress, 451
Amiri, Z., (1087)
Ammophila breviligulata, Marasmius blight of, histopathology in, 725, **726**, **727**
Anagnostakis, S. L., (205), (1017), (1080)
Andrew, J. H., 1214
Andries, H. L., (1214)
Anguina tritici, ATP in larvae of, cryptobiosis activation, 806
antibiotics
  chlortetracycline, penicillin, tetracycline on Citrus, stubborn disease & infectious variegation affected by, 1044
  Penicillin, symptom remission of clover club leaf by, 44, **45**
  streptomycin
    for Peronospora, role of Mg & Ca, 34
    peronosporale affected by, specificity in, 1172
Aphanomyces spp., on Echinodorus brevipedicellatus, blight of, 289, **293**
  euteiches
    growth & reproduction of, CO_2 & O_2 effects on, 1053
    on pea, mineral salt effects on, 989
Aphelenchoides composticola, on Agaricus bisporus, control of, 1455
Aphis gossypii, citrus tristeza virus vector, 716
Apium graveolens (see **celery**)

apple
clover yellow mosaic virus on, leaf pucker symptoms, 50, **52, 54**
fireblight on, protection by bacteria, 1075
hypocotyls from, use in scab research, 363, **364, 365**
prunings of, source of Physalospora conidia, 1080
scar skin tissue of, histopathology, 206
thiabendazole applied to, pressure injection technique, 1166
Venturia inaequalis on leaves of, host-parasite interaction, 649
viruses of, respiration, organic acid, & sugar relations, 1483
Xylaria mali on, fungicides for root infection, 805
apple chlorotic leaf spot virus, strains of, biological & physical properties, 1458
Apple, J. L., 1436
apple mosaic virus
on birch, line pattern symptom, 1470, **1472**
from rose, serological properties of, 238
Arachis hypogaea (see **peanut**)
Aragaki, M., (553)
Armbrust, D. V., (1417)
Armillaria mellea
growth on agar, effect of fumigants on, 1352
growth infected by ethanol & phenol, 743
on maple, defoliation effect on, 209
Trichoderma interaction with, methyl bromide effects on, 965, **971**
Armstrong, G. M., 440
Armstrong, J. K., (440)
Arny, D. C., (837), (946)
Ascochyta spp., on peanut, fungicides for, 447
imperfecta, on alfalfa, glycosidase activity & flavonoid accumulation in, 739
phaseolorum, on cucurbits, 444
ash (see **Fraxinus** americana)
Ashworth, L. J., Jr., 1214
Aspergillus
chevalieri, aflatoxin in rice affected by, 1507
flavus
aflatoxin production in, DMSO treatment for, 936
fungistasis in, bioassay for, 756
parasiticus, aflatoxin in rice produced by, effect of A. chevalieri, 1507
ruber
on pea, respiration effects, 1040
pea seed deterioration by, toxin relation, 46, [944]
on pea seed, mitochondrial dysfunction, 202
Athow, K. L., 1021
Avena sativa (see **oats**)
Avizohar-Hershenson, Z., (651)
avocado (see **Persea americana**)
Aycock, R., 440
Ayers, J. E., (200)
azalea
Cylindrocladium disease of, control, 440
Cylindrocladium spp. on, microsclerotial formation on, **187, 189**

Backman, P. A., 440, (447)
bacteria (see also **mycovirus, viruses,** and under specific genera)
epiphytic, associated with healthy soybean plants, 1464
bacteriophage
from Corynebacterium michiganense, use in identification, 1398
from Xanthomonas pruni, relation to bacterial spot disease, 1279
Bain, D. C., 197
Baker, R., (756), 1214
Bakker, W., (1407)
Banfield, W. M., (202)
Banttari, E. E., (393)
barley (see also **Hordeum spontaneum**)
powdery mildew of, penetration process, 1049, **1051, 1052**
seed treatment of, physical tests, 444
snow mold of, role of basidiospores of Typhula on, 115
barley yellow dwarf virus
Rhopalosiphum padi vector for, selective transmission by, 1317
systemic movement in grains, 854
Bar-Joseph, M., 716
Barnett, H. L., (802)
Bashi, E., 1542
Batchelor, D. L., (1260)
Bateman, D. F., 199, (207), 945, 1523
Bath, J. E., (432)
Batson, W. E., Jr., 440
Baxter, L., 440
Bdellovibrio bacteriovorus, on soybean, bacterial blight controlled by, 400
bean (see also **Phaseolus** vulgaris & under genera of)
root-rot of, soil pesticides for, 449
Bean, G. A., (936)
bean pod mottle virus, survival in beetles, 259
bean yellow mosaic virus, on Phaseolus vulgaris, resistance to, 196
Beckman, C. H., (98)
Beer, S. V., (207)
beet (see also **sugar beet**)
curly top virus of, extraction from plants, 1209
beet curly top virus, serological tests of, infectivity neutralization in, 1107
beet mosaic virus, on sugar beet, inheritance of resistance to, 877
beet western yellows virus, on sugar beet, resistance to, 621
beet yellows virus, on sugar beet, resistance to, 621
Bell, D. K., 1544
Ben-Jaacov, J., 37
benomyl (see **fungicides,** specific)
Benson, D. M., 1214
benzimidazole (see **fungicides,** specific)
Berbee, J. G., (1470)
Berger, R. D., 535, 930, 1161
Bergquist, R. R., 1214
bermudagrass, spring dead spot of, relation to soil type, 450
Beta vulgaris (see **sugar beet**)
Betula spp., apple mosaic virus on, line pattern symptom of, 1470, **1472**
Beute, M. K., 1204
Bhalla, R. B., 906
Biehn, W. L., 421, 655
biological control
aquatic plants by Rhizoctonia solani, 681, **683**
Armillaria mellea & Trichoderma spp., methyl bromide relation, 965, **971**
bacteria for pear fire blight, 872
Bdellovibrio bacteriovorus for soybean blight, 400
biological factor for Ophiobolus graminis, on wheat, 511
fireblight on apple & pear by nonpathogenic bacteria, 1075
oak wilt in Arkansas, 1027
Phytophthora cinnamoni, on pine, 18
Scytalidium isolates against wood decay, 473, **475**
soybeans to bacterial blight, bacterial relations, 752
take-all of wheat, N effects, 882
technique for soil application, 440
Birchfield, W., 38

Bird, J., 1435
Black, L. M., (44), (692), (1139)
Blasingame, D. J., 440
Bliss, F. A., 837
Bloom, J. R., 199
Bloomberg, W. J., 337
blueberry (see **Vaccinium corymbosum**)
bluegrass (see **Poa pratensis**)
Boatman, S., 801
Bolkan, H., (542)
Boller, R. A., 1507
Boltan, W. E., 1501
Bonde, M. R., 199
Boothroyd, C. W., (205), (529)
Bootsma, A., 1157
Borecka, H., 1431
Botrytis
allii
cell penetration by, in onion, penetration study, 446
on onion, infection vs. nuclear movement, 448
cinerea
benomyl tolerance in, 1218
on grape, time & latency of infection, 1151, **1153**
on macadamia, nut set reduced by, 939
on onion, 200
symptoms & histopathology of, 1231, **1232–1234**
on pepper, capsidiol oxidized by, 1225
spore germination in, pollen effects on, 1431
on stored cabbage, virulence variation of, 210
on Vicia faba, relation to ozone, 204
Bourne, C. E., (30)
Bowers, J. L., (442)
Boyd, H. W., 70
Boyer, J. S., 466
Bozarth, G. A., (1501)
Bozarth, R. F., (1019)
Bradley, R. H. E., (1343)
Brassica carinata, Fusarium wilt of, 440
Braun, A. J., (202), 1433
Bravdo, B., (1411)
Brennan, E., (50), (206)
Bricker, J. L., (965)
Bridge, M. A., 606
Bristow, P. R., 808
Browder, L. E., 524
Brown, G. E., 440, 1104
Brown, M. F., (296)
Brown, R. D., Jr., (801)
Brown, T. S., Jr., 547
Bruehl, G. W., (115), (413)
Brueske, C. H., 329
Buchenauer, H., 1091
Bugbee, W. M., 480
Burgis, D. S., (1285)
Burleigh, J. R., (211), (348)
Burpee, L. L., (199)
Burr, T. J., 1215, (1493), (1496), 1499
Burton, G. W., (499)
Bushnell, J. L., (1219)
Butler, E. E., 542
Byers, R. A., (428)

cabbage, Xanthomonas campestris on, spatial distribution in, 998
Cajanus cajan, rhabdovirus & mycoplasmalike organism on, 202
Caladium hortulanum, technique for pathogen-free plants, 442
Calavan, E. C., 256, (1044)
Callbeck, L. C., (1269)
Calonectria sp., perfect stage of Cylindrocladium scoparium, 448
crotalariae, on papaya, pathogenicity to, 553, **554, 556**
Calvert, O. H., (296), 769
camellia, disease complex of, new, 449
Campbell, L. L., (446)
Campbell, R. N., (1191)
Capsicum
annuum
aphid-transmitted viruses of, trapping methods for, 1207
pepper virus of, inheritance of tolerance to, 1211
Xanthomonas vesicatoria on
serotypes unrelated to pathotypes, 1260
from tomato, hypersensitivity in, 915
frutescens, capsidiol produced by, in bacterial soft rot lesions, 1537
captafol (see **fungicides**, specific)
captan (see **fungicides**, specific)
carbon disulfide, effect on Armillaria & Trichoderma in culture & relation to survival in soil, 1352
carboxin (see **fungicides**, specific)
Carica papaya
collar rot of, pathogenicity tests, 553, **554, 556**
Phytophthora palmivora on, chlamydospore production in, 559, **560**
carnation, Fusarium stem rot of, control in irrigation culture, 1214
Carnes, D., (663)
carrot
chlorogenic acid & methoxy mellein in, effect of Ethrel & Ceratocystis, 408
Rhizoctonia solani on, factors affecting, 276, **279**
tissue conductivity increased in, 424
Carthamus tinctorius (see **safflower**)
Casper, R., 238, (1118)
cassava mosaic virus, 206
Cassia obtusifolia, Collectotrichum fragariae on, reservior for, 533
Castillo, M. B., 583
Castor, L. L., 200
cauliflower mosaic virus, differential transmissibility of, by aphids, 910, [1212]
celery
Cercospora apii in mixed populations, infection rates, 535
early blight of, analysis of disease spread in Florida, 1161
cellulase (see **enzymes**, specific)
Cenococcum graniforme
on pine, ectomycorrhizae, 1034, **1037**
on Pinus echinata, relation to Phytophthora, 18
Cephalosporium
gramineum, propagules in soil, quantitative detection of, 1198
gregatum, on soybean, stem rot vs. floral induction, 447
Ceratocystis
fagacearum
biological control of, in Arkansas, 1027
on oak, compatibility types of, 803
on Quercus ruba, leaf abscission anatomy from, 252, **253, 255**
on Quercus spp., amino acid relation to wilt, 801
fimbriata, on carrot, chlorogenic acid & methoxy mellein related to, 408
ulmi
on elm
benomyl for control of, 1239
fungicides for control of, 735
infection localized, 207
mating reaction, 202
water relations, 98
sporulation inhibited by fluorophenylalanine, 421
Cercospora

apii
on celery
analysis of disease spread in Florida, **1161**
infection rate, 535
arachidicola
on peanut
aerobiology of, 703
relation to leaf rust, fungicides for, 668, **671**
kikuchii
on soybean, cause of purple seed stain, 796
soybean seed germination affected by, 1021
personata, on peanut, relation to leaf rust, fungicides for, 668, **671**
Cercosporella herpotrichoides
sporulation of, temperature-gradient plate for, 287
in wheat
soil-borne inoculum of, 1216
spore production in, 981, 984
cereal
African cereal streak of, new disease in East Africa, 1407, **1408, 1409**
translocation of benomyl in, for powdery mildew control, 814, **816**
Cerotoma trifurcata, bean pod mottle & cowpea mosaic viruses in, survival of, 259
Chairez, R., 1458
Chaplin, J. F., (442), (806)
Charudattan, R., 1260
Chase, L. L., (1206)
Chen, M., 194
Chen, T. A., (209), (803)
cherry leaf roll virus
dogwood ringspot strain of, electron microscopy, purification, & serology of, 141, **143**
strains of, serological tests in, 566
chloroneb (see **fungicides**, specific)
chlorothalonil (see **fungicides**, specific)
Cho, J. J., 1215, (1219)
Cho, Y. S., 760
Chondrilla juncea, viruslike particles in, 791, **792**
Choopanya, D., 1536
Choudhury, M. M., 127
Chow, H. S., 1428
Christenson, J. A., 784
Christias, C., 602
chrysanthemum
Botrytis cinerea on, benomyl tolerance to, 1218
Fusarium oxysporum on, pathogenesis & dissemination of, 441
Fusarium wilt of
fungicide-lime-nitrate regime for, 1256
symptomatology & cultivar reaction, 1435
Pseudomonas aeruginosa on, introduction into hospitals, 1215
Pseudomonas viridiflava on, leaf spot cause by, 1219
Chrysanthemum spp., Fusarium wilt of, effect of N & lime, 155
morifolium
Mycosphaerella ligulicola on, ascospore discharge in, 586
virus indexing of callus cultures from, 37
Citrullus lanatus (see **watermelon**)
citrus
Geotrichum candidum on, 440
leaves of, use for Phytophthora isolation in soil, 540
nematodes of, foliar sprays for, in oranges, 1217
stubborn disease of, mycoplasma relation, growth factors in, 256, **257**
citrus greasy spot, action of oil on, 262
Citrus spp.
stubborn disease & infectious variegation of, tetracycline antibiotics for, 1044, **1046**
tristeza virus on, aphid transmission in, 716, **717**
sinensis
Mycosphaerella citri on, fungicides for, 262
Penicillium digitatum on, development of, 1104, **1105, 1106**
Civerolo, E. L., 1279
Claflin, L. E., 1417
Clark, C. A., 200, 1231
Clitocybe tabescens
on peach roots, root injury effects on, 449
sporophore production & heterothallism in, 1218
clover club leaf
rickettsia-like cause, evidence for, 1139, **1141–1144**
symptoms of, remission with penicillin, 44, **45**
clover, red- (see **Trifolium** pratense)
clover yellow mosaic virus
on apple, leaf pucker symptoms, 50, **52, 54**
from pea roots & leaves, purification of, 926
Coakley, S. M., 1191
Cochliobolus miyabeanus, on rice, enzyme relation, 448
Cochran, G. W., 1215
Cochran, H. R., (1216)
Cohen, A., (1166)
Cohen, S., 1207
Cohen, Y., 200, 1172
Cole, H., Jr., (201), (209)
Colletotrichum
destructivum, on tobacco, effect on growth, 495
fragariae, on Cassia obtusifolia, reservoir of, 533
gloeosporioides, on Limonium bonduellii, symptoms & control, 193
graminicola, on corn, penetration ultrastructure of, 447
lindemuthianum
on bean
mycelium longevity in tissues of, 1334
relation to phytoalexin, 572
protease secreted by, purification of, 625
Collecephalus
hemerocalli, on daylily, histopathology of, 864, **865**
macrosporum, on Hemerocallis, new sp. of, 445
Comstock, J. C., 24, (640), 689, 1357
Comstock, V. E., (777)
Conocarpus erectus, Cylindrocladium scoparium on, pathogenicity & control, 446
Converse, R. H., 780
Cook, A. A., 915, (1211)
Cook, R. J., 451, (511), (882)
Coprinus lagopus, temp effect on growth of, 206
Corbett, M. K., (804)
corn
cell wall degradation by H. maydis enzymes, 1523
Colletotrichum graminicola on, penetration ultrastructure in, 447
corn stunt agents in, transmission of, 127
corn stunt disease of spiroplasma relation, 403, **404-406**
Erwinia stalk rot of, inoculation method, 658
Fusarium spp. on, prevalence in roots, rhizosphere, residues, & soil, 1288
Helminthosporium carbonum on, role of host-selective toxin, 24, **25**
Helminthosporium diseases of, electron microprobe use in, 689
Helminthosporium maydis on
ear-rotting potential of race T, 769, **771**
leaf factors affecting blight from, 205
race T origin, 112
seedling wilt affected by temp & fungicide, 138
spore removal from, 1252
toxin induction of electrolyte leakage, 640

ultrastructural changes in leaves from race T, 296, **298, 299**
Helminthosporium turcicum on
histochemistry of glucosidase on, 243, **244**
spores inhibited by leaf diffusates from, 1393
maize dwarf mosaic virus on
purification by centrifugation, 1386
replication in pigment-deficient mutants of, 1311
Mycosphaerella zeae-maydis sp. n., perfect stage for Phyllosticta, 529, **531**
Phyllosticta maydis on
epidemiology, 200
toxin from specific to male-sterile hybrids, 1357, 1361
stalk rot of, Helminthosporium rostratum cause, 1336
corn stunt
johnsongrass host for, 440
serological studies of, 803
Cornus florida, cherry leafroll virus on, purification, electron microscopy, & serology of, 141, **143**
Coronilla spp., peanut stunt virus on, resistance to, 806
Corynebacterium
insidiosum, on alfalfa, varietal differences in movement of, in plants, 760
michiganense
bacteriophage of, use in identification, 1398
on tomato, factors affecting, 773
toxic compound from mutant of, 1217
Corynespora cassiicola
on Ligustrum, new leaf spot of, 445
on tomato, inheritance of resistance to, 837, **838**
Costantini, A., 200
cotton
boll rot of
cuticle role in resistance, 315, **317**
peroxidase activity related to infection, 1095
by Phytophthora parasitica, 896, **897–899**
Diplodia gossypina on, spore germination, 1181, **1182**
Fusarium oxysporum vasinfectum on, water, pH, & temp effects, 413
lint rot of, Nigrospora vs. Siteroptes on, 308
Meloidogyne incognita vs. Verticillium albo-atrum in, 485
methyl benzimidazolecarbamate uptake & translocation in, oil effect on, 1219
Rhizoctonia disease of, Trifluralin effect on, 651
Rhizoctonia solani on, histochemistry of infection, 157, **158, 160**
Rhizoctonia vs. Verticillium factors affecting, 352
Verticillium albo-atrum on
systemic fungicides for, 1091
water, pH, & temp effects on, 413
Verticillium dahliae on, temp & water stress effects on, 953, **956, 957**
Verticillium wilt of, endopolygalacturonase relation, 62, **63**
Covey, R. P., Jr., 844
Cowling, E. B., (235)
cowpea (see **Vigna** sinensis)
cowpea chlorotic mottle virus
multiplication & pathogenesis of, in double infections, 1380
RNA of, infectivity affected by phenols, 209
cowpea mosaic virus
on Phaseolus lathyroides, in Puerto Rico, 120, **121**
survival in beetles, 259
cowpea virus, host range & serological properties of, 208
Cox, R. S., (193)
Crambe abyssinica & hispanica, Fusarium wilt of, 440
Criconema spp., cuticle ultrastructure of, 209
Criconemoides spp., cuticle ultrastructure of, 209
xenoplax, on peach, relation to Pythium, 994, **995**
Crill, P., 1285
Cronartium spp., on conifers, diagnosis method for, 445
fusiforme
on loblolly pine, role of wounds, **445**
on oak, basidiospore cast from, **441**
on pine, monoterpene relation, 551
on slash pine, losses from, **447**
ribicola, on Pinus monticola, electron microscopy of, 1420, **1421**
crop residues, Fusarium root infection of corn affected by, 1288
Crosby, F. L., (703)
Crosse, J. E., 1425
cucumber
anthracnose of
lesion ultrastructure of, 442
resistance to, 442
benomyl translocation in, for mildew control, 814, **815 816**
cucumber mosaic virus, peanut stunt virus compared to, properties, 801
Cucumis sativus (see **cucumber**)
cucurbits, Ascochyta blight of, 444
Cunfer, B. M., 115
curly top virus
extraction from beet, 1209
on Phaseolus vulgaris, resistance related to temp, 1218
on tomato, resistance factors in, 1218
Curtis, L. R., 200
Curvularia
senegalensis, from sugarcane & johnsongrass, isolation & factors affecting, 1541
trifolii, on Gladiolus, leaf exudates related to, 1204
Cylindrocladium spp.
on azalea, microsclerotial formation of, 187, **189**
on papaya, collar rot caused by, 553
scoparium
on azalea, control & diagnosis of, 440
Calonectria state of, **448**
on Conocarpus erectus, pathogenicity, 445
Cytospora sp., on apple, secondary invader in twigs, 1080
leucostoma, on peach, xylem dysfunction in, 676

Darby, W. B., (1115)
Davis, D. D., 371, 381
Davis, J. R., 1215
Davis, R. E., 403
Davis, T. C., (1424)
Dawson, W. O., (1380)
Day, P. R., 1017
Deahl, K. L., 801
Delp, C. J., (814)
Dendrophoma obscurans, strawberry fruit rot from, 419
Derrick, K. S., 441
Dessureault, M., 200
DeVay, J. E., (953)
Dhingra, O. D., 934
Diaphorina citri, citrus Likubin pathogens in salivary glands of, 194, **195**
Diaporthe phaseolorum sojae, soybean seed germination affected by, 1021
Diaz, A. J., (803)
Dicentra spectabilis, witches'-broom of, mycoplasmalike bodies in, 88, **89, 91**
2,6-dichloro-4-nitroaniline (see **fungicides**, specific)
Diener, T. O., 1328
dimethylaminobenzenediazo sodium sulfonate (see **fungicides**, specific)
Dimock, A. W., (37), (586)
Dimond, A. E., (655), (1202)

Dioscorea floribunda, viruses of, separation & electron microscopy in, 1435
diphenol oxidase (see **enzymes,** specific)
Diplodia
gossypina
cotton boll rot from, peroxidase related to, 1095
on cotton, cuticle factor in resistance, 315, **317**
spore germination in, phenolics & carbohydrates related to, 1181
maydis, morphology of, electron microscopy for, 446
dodine (see **fungicides,** specific)
Dothistroma pini, on pines, infection in Nebraska, 1060
Doupnik, B., Jr., (191)
Dow, R. L., (708)
Dropkin, V. H., (329)
Drummond, D. B., 201

Durbin, R. D., (252), 451, 1077
Dutch elm disease
benomyl for control of, 1239
fungicides for, 735
Dwinell, L. D., 441

Echandi, E., (773), 1398
Echinodorus brevipedicellatus, Aphanomyces blight of, symptoms & host range, 289, **292, 293**
ectomycorrhizae, on pine, relation to Meloidogyne sp., 1034, **1036–1038**
Edgington, L. V., (200), (505)
Edmunds, L. K., 388
Eichhornia azurea, Rhizoctonia solani on, pathogenicity to, 681
electron microscopy (see also **ultrastructure**)
African cereal streak, new disease in East Africa, 1407, **1409**
apple mosaic virus on birch, 1470, **1475**
beet curly top virus, serological tests, 1107, **1109**
cacti viruses, 1133, **1134–1138**
cherry leafroll virus, dogwood ringspot strain of, 141, **143**
clover club leaf, rickettsia-like cause, 1139, **1141–1144**
clover yellow mosaic virus, in apple, 50, **54**
Cronartium ribicola on Pinus monticola, 1420, **1421**
Diaphorina citri, salivary gland of, 194, **195**
Diplodia maydis, on artificial substrate, **446**
maize dwarf mosaic virus, 149, **150**
purification of, 1386, **1391**
unstable inclusions induced in, 1066, **1067–1070**
pea seed-borne mosaic virus, purification of, 1346, **1351**
peanut mottle virus, mild mottle strain of, 720, **723**
petunia vein-clearing virus, in host cells, 1118, **1120–1123**
plantago mottle virus, new member of tymovirus group, 1313, **1314**
potato virus X, protoplasts infected with, 1125, **1128**
powdery mildew on barley, penetration process, 1049, **1051, 1052**
purple-top wilt of potato, 204
rickettsia on peach, with phony disease, 1275, **1276, 1277**
rickettsia in peach tree xylem, 1422, **1423**
rickettsialike organism of Pierce's disease, 341, **344**
sesame phyllody disease, **1536**
soybean mosaic virus in root nodules, 1011, **1012–1016**
spinach yellow dwarf virus, **538**
Streptomyces on potato, 205
sugarcane mosaic virus, on Stenotaphrum secundatum, 162, **165**
TMV inclusions, factors affecting dissolution, 1003, **1005–1008**
TMV-like particles in Uromyces phaseoli, 1111, **1113**
tobacco ringspot virus, on soybean, translocation in, 1291, **1295–1298**
uranyl acetate use in, technique, 797, **798**
Ustilago maydis, viruslike particles from, 1019, **1020**
viruslike particles in
blueberry, 432, **433, 435**
Chondrilla juncea, 791, **792**
virus separation in Dioscorea floribunda, 1435
electrophoresis, oat leaf RNA, crown rust relation, 491
Ellis, D. E., (1434)
elm (see also **Ulmus** americana)
Ceratocystis ulmi on, benomyl for control of, 1239
elm mosaic virus, strain of cherry leaf roll virus, serological properties, 566
Emert, G. H., 801
endopolygalacturonase (see **enzymes,** specific)
Endothia gyrosa & parasitica, differentiation by disk gel electrophoresis, 801
Engelhard, A. W., (155), 441, 1256, 1435
English, H., (994)
Enns, H., (1517)
enzymes (general) (see also **enzymes,** specific)
anaplerotic-, effect of CO_2 fixation, 947
cell wall-degrading, by Helminthosporium maydis, 199
extracellular-
from Erwinia on cucumber, 208
role in Helminthosporium maydis on corn, 1523
Monochaetia mali in apple fruit, enzyme changes in, 851
from snail, effect on Pythium oospore germination, 133
snail enzyme complex, Phytophthora oospore germination induced by, 1083
enzymes (specific) (see also **enzymes,** general)
cellulase, in Penicillium expansum, catabolite repression of, 840
diphenol oxidase, in apple, postharvest decay by fungi, 1115
endopolygalacturonase, Verticillium wilt of cotton involvement, 62, **63**
glucosidase
histochemistry of, in corn, 243, **244a**
role in Phoma on peppermint, 973
glycosidase, in Ascochyta-infected alfalfa, 739
pectin lyase
in Penicillium expansum, catabolite repression of, 840
produced by Penicillium expansum, on apple & in culture, 231
pectolytic & endopolygalacturonate trans-eliminase, role in storage rot of sugar beet, 480
peroxidase, cotton boll rot relation to activity of, 1095
phosphoenolpyruvate carboxykinase, in Verticillium albo-atrum, CO_2 fixation effect, 947
polygalacturonase, in Penicillium expansum, catabolite repression of, 840
protease, from Colletotrichum lindemuthianum, purification of, 625
pyruvate carboxylase, in Verticillium albo-atrum, effect on CO_2 fixation, 947
RNA polymerase, in Agrobacterium tumefaciens, 206
epidemiology
bean to Colletotrichum lindemuthianum, mycelium longevity in, 1334
black point disease of wheat, inoculum composition in, 1220
Cercosporella footrot of wheat, 981, 984

Fusarium canker of sugar maple, 367
Helminthosporium maydis on corn, regression analysis of, 205
Helminthosporium turcicum on corn, lesion number vs. spore number & fungicides, 930
leaf rust & Cercospora leaf spot on peanut, 668
Mycosphaerella ligulicola, ascospore discharge, 586
peanut leafspot fungi, aerobiology, 703
peanut mottle disease, 446
Phyllosticta maydis on corn, 200
potatoes to late blight, interplot interference, 1269
powdery mildew
vs. leaf rust on wheat, 183
of wheat, conidial production of, 847
principles of, 1324
Rhizoctonia solani on radish, 1214
role of wind-blown soil in Xanthomonas spp. on alfalfa & bean, 1417
rusts & mildew on wheat, vertical spore concentration relations, 211
stem rust of wheat, equations for, 348
wheat & slow mildewing factors, 1307
Xanthomonas campestris on cabbage, sequential sampling in, 998
Epstein, E., 1411
Erb, K., 1334
errata
for 1972, 431, 656, 944, 1212
for 1973, 944, 1212, 1322
Erwin, D. C., (1091), (1218), (1219)
Erwinia spp., on corn, inoculation method in, 658
amylovora
bacteria antagonistic to, on apple & pear fruit, 1075
cell wall polysaccharides not degraded by, 207
on pear
population dynamics of, 844
protection by bacteria, 872, **874**
selective medium for, 1425
carotovora, extracellular enzymes affecting, on cucumber, **208**
rubrifaciens
on Juglans regia, factors affecting infection, 327
in Persian walnut, systemic movement of, 1085
Erysiphe
cichoracearum, benomyl for control of, systemic, 814, **816**
graminis
on barley, infection process, electron microscopy, 1049, **1051**, **1052**
benzimidazole resistant strain of, 1366
viruslike particles in, 1111
on wheat
relation to Puccinia recondita, 183
slow-mildewing resistance to, 867
vertical spore concentrations in field, 211
graminis hordei, on barley, mobile nurseries for study of, 1330
graminis tritici
conidial production of, 847
on wheat, slow mildewing factors in, 1307
Euonymus spp., NEPO virus from, characterization of, 804
Eversmeyer, M. G., 211, 348
Eyal, Z., 1087, 1330

Fagan, S., (440)
false broomrape, on tobacco, tumor formation in, 546
Farag, I. S., 1215
Fay, F., (1081)
Feder, W. A., (1539)
Fenwick, H. S., (1215)
Ficus elastica, leaf spot of, fertilizer effect on, 1084
fire blight (see **Erwinia** amylovora)
Fischer, W. R., (844)
flax, Melampsora lini on, genes for resistance to, 777
Florance, E. R., 1216

Fulton, R. H., 1441
fungicides (general) (see also **fungicides**, specific)
air pollution damage suppressed by, 204
for apple scab, 207, 208
for apple root infection, 805
Caladium bulb & root rot prevention, 448
copper, benomyl, & oil for citrus greasy spot, 262
Dutch elm disease control, 735
for fruits & vegetables, acetaldehyde vapors for, 544
for Helminthosporium wilt of corn, 138
oxidant injury to bean suppressed by, 1415
of pecan, leaflet mycoflora & scorch, 445
systemic, uptake & breakdown by soybean seeds, 1532
transcuticular movement of, 505
fungicides (specific) (see also **fungicides**, general)
benomyl
in bean, relation to ozone, 1539
for Botrytis on chrysanthemum, tolerance to, 1218
for Colletotrichum on Limonium, 193
distribution & metabolism in strawberry, 890
for Dutch elm disease control, 1239
elm seedling growth affected by, 85
fungus & mite control in plants, 814, **815**, **816**
for Fusarium wilt on chrysanthemum, 1256
on grass, tolerance to, 201, [944]
for Helminthosporium wilt of corn, 138
for Monilinia laxa on almond, dormant sprays for, 830, **836**
oxidant injury in bean suppressed by, 1415

systemic activity in almond blossoms, 959, **960**
transcuticular & translaminar movement of, 505
Ustilago striiformis growth induced by, 1074
Verticillium malthousei affected by, 209
Verticillium tolerance, 203
benzimidazole
Erysiphe graminis strain resistant to, 1366
ozone resistance in bean affected by, 208
captafol, transcuticular & translaminar movement of, 505
captan, transcuticular & translaminar movement of, 505
carboxin
oxidant injury in bean suppressed by, 1415
transcuticular & translaminar movement of, 505
chloroneb, on Ustilago maydis, effect on growth & metabolism of, 219
chlorothalonil, transcuticular & translaminar movement of, 505
2,6-dichloro-4-nitroaniline, fate of, in soil, 209
dimethylaminobenzenediazo sodium sulfonate, Phytophthora root rot of avocado controlled by, 267, **269**, **271**
dodine
for TMV, foliar sprays, 1428
transcuticular & translaminar movement of, 505
Venturia inaequalis tolerance to, genetic control of, 1189
glyodin, for TMV, foliar applications, 1428
methyl benzimidazolecarbamate
on cotton, Verticillium wilt affected by, 1091
systemic activity in almond blossoms, 959, **960**
oxycarboxin, on bean, amino acid metabolism affected by, 686
PCNB
for corn head smut, 1215
Rhizoctonia control by plant accumulation, 808, **811**, **812**
phenylmercurimonoethanol ammonium acetate, transcuticular & translaminar movement of, 505
potassium azide, for soil microorganisms, 444
thiabendazole
in apple trees, infiltration & translocation, technique for, 1166
transcuticular & translaminar movement of, 505
thiophanate
transcuticular & translaminar movement of, 505
Verticillium wilt of cotton affected by, 1091
thiophanate-methyl, transcuticular & translaminar movement of, 505
triarimol, oxidant injury in bean suppressed by, 1415.
zineb, Verticillium tolerance to, 203

fungistasis
alfalfa hay vs. Sclerotium rolfsii, 359, **360**
inhibitory factor in soil, 756
Pythium aphanidermatum
oospore germination in soil, 1496
in soil, 1493, **1494**
sclerotium-forming fungi affected in, mycelial constituents conserved, 602
Sclerotium rolfsii, role of volatiles, 500, **501**
soil-, in 17 fungi, 334

Funk, D. W., 801

Fusarium spp.
canker of sugar maple by, 367
chlamydospore formation in, in salt solutions, 597, **599**
on corn, prevalence in roots, rhizosphere, residues, & soil, 1288
Melanospora zamiae parasitic on, 802
on oats, in roots, rhizospheres, residues, & soil of, 1401
on potato, chemical treatments of, 203
on wheat roots, fertilization & wheat refuse effects on 6 spp., 103
moniliforme, on sorghum, association with Sclerospora, 197
oxysporum
on chrysanthemum
fungicide-lime-nitrate regime for, 1256
N & lime effect on, 155
pathogenesis & dissemination, 441
symptomatology & cultivar reaction, 1435

scab of, chemical control of, 441
pectin lyase (see **enzymes**, specific)
pectolytic (see **enzymes**, specific)
Pelargonium hortorum, Puccinia pelargonii-zonalis, hot-water therapy for, 273
Penicillium
digitatum, on Citrus, development vs. degreening of, 1104, **1105**, **1106**
expansum
on apple, postharvest decay, diphenol oxidase activity in, 1115
enzyme synthesis in, catabolite repression of, 840
pectin lyase produced by, on apple & in culture, 231
Peniophora sp., on 5 conifers, chemical changes induced in, 1338
pepper (see **Capsicum**)
pepper mottle virus, on Capsicum, inheritance of tolerance to, 1211
peppermint (see **Mentha** piperita)
Peridermium harknessii, aeciospore dispersal in, 170
Perkins, V. Q., (1217)

Perl, M., (1172)
Peronospora parasitica, streptomycin inhibition of, role of Mg & Ca, 34
peronosporales, pathogens in, streptomycin action against, 1172
peroxidase (see **enzymes**, specific)
Persea americana, Phytophthora root rot of, control with Dexon, 267, **269, 271**
Person, L. H., (444)
Pestalotia longisetula, strawberry fruit rot caused by, 443, 862, **863**
Petersen, L. J., (1125)
Peterson, C. A., 235
Peterson, G. W., 170, 246, 1060
Pettit, R. E., 447
Petunia hybrida, peroxyacetyl nitrate effect on, 201
petunia vein-clearing virus, electron microscopy & inclusions in, 1118, **1120–1123**
Phaseolus
lathyroides, cowpea mosaic virus on, in Puerto Rico, 120, **121**
lunatus, Rhizoctonia solani on, host tissues colonized by, 1024
vulgaris
air pollution injury in, suppression by fungicides, 204
bean rust of, DNA synthesis in, 207
bean yellow mosaic virus of, resistance to, 196
benomyl & ozone relation, 1539
benomyl translocation in, for mildew control, 814, **815, 816**
Colletotrichum of, phytoalexin in, 572
Colletotrichum lindemuthianum on, mycelium longevity in tissue of, 1334
common blight of, role of wind-blown soil in epidemiology of, 1417
curly top in, relation of temp to resistance, 1218
golden yellow mosaic of, in Puerto Rico, 1435
nematode-fungus interaction, for dry rot, 749
oxidant injury of, suppressed by systemic fungicides, 1415
oxycarboxin effect on, amino acid metabolism of, 686
ozone
effect on, 200
P level of, 206
injury to, anti-senescent compounds for, 903
resistance vs. antisenescence affected by benzimidazole, 208
phytoalexin affecting, differential sensitivity of fungi from, 1477
Rhizoctonia rot of, control by PCNB accumulation, 808, **811, 812**
Sclerotinia sclerotiorum on, histopathology of, 708, **709, 711, 713**
TMV on, in victorin-treated plants, 449
whitefly on, transmission of, 803
phenylmercurimonoethanol ammonium acetate (see **fungicides**, specific)
Phialophora melinii, on maples, relation to extractable phenols in wood, 167
Phillips, D. J., 273
Phillips, D. V., (70), 447
Phipps, P. M., 804, (806)
Phoma
betae, on sugar beet, storage rot from, sucrose & cell wall factors affecting, 480
strasseri, on peppermint, glucosidase role in, 973
Phomopsis juniperovora, on Juniperus virginiana & J. scopulorum, infection study, 246
phony peach disease, rickettsia-like bacterium associated with, 443
phosphoenolpyruvate carboxykinase (see **enzymes**, specific)
Phyllosticta maydis
conidial germination of, incubation chamber for humidity control, 1157
on corn
epidemiology of, 200
perfect stage for, 529, **531**
toxin from, specific for male-sterile corn, 1357, 1361
Physalospora obtusa
in apple, postharvest decay of, diphenol oxidase activity in, 1115
conidia of, in apple pruning, 1080
suppression by Trichoderma, 205
physiology of disease (see also **physiology of microorganisms** and **temperature**)
alfalfa to Ascochyta, glycosidase activity & flavonoids, 739
apple viruses & respiration, organic acid & sugar relations, 1483
Colletotrichum on bean, phytoalexin nature of, 572
cotton boll rot & peroxidase activity, 1095
fungal oxidation of capsidiol in pepper, 1225
Helminthosporium leaf blight of rice, enzyme relation, 448
Meloidogyne hapla on rose, effect of nematicides on, 1411
pea seed respiration from Aspergillus ruber infection, 1040
phenols in root knot of tomato, 329
potato to Phytophthora, rishitin & steroid glycoalkaloids, 826, [1322]
Rhizoctonia & Verticillium on cotton, 352
rice blast related to N & biochemical processes, 1202
Sclerotinia sclerotiorum on carrot, 424
tobacco to Alternaria & Colletotrichum, 495
water stress & pathogenicity, 451, 458, 466
white- & brown-rot fungi in conifer woods, 1338
physiology of microorganisms (see also **physiology of disease** and **temperature**)
Armillaria mellea, growth affected by ethanol, 743
Fomes applanatus, vitamin effect on germination, 547
Fusarium & Verticillium in cotton, 413
Helminthosporium maydis, thiamine for sporulation inhibition, 900
Monochaetia mali, protein & isozyme change in apple, 851
Penicillium expansum, catabolite repression of enzyme synthesis in, 840
Phytophthora spp., chemotactic response of, 1511
Pseudomonas solanacearum, inhibition by potato extracts, 942
Saccharomyces pastorianus, chlorothalonil in cells of, reaction sequence, 448
Tilletia caries, teliospore germination, 643, [1212]
Verticillium albo-atrum, CO_2 fixation, enzymes catalyzing, 947
Verticillium spp., ultraviolet light effects, 1488
phytoalexin (see also **toxin**)
in alfalfa, from Ascochyta infection, 739
in bean, heat-induced protection for anthracnose, 572
capsidiol in pepper
oxidized by fungi, 1225
role in bacteria, 1537
in carrot root, effect of Ethrel & Ceratocystis, 408
on corn, search for, 729, **731**
Helminthosporium carbonum on corn, role of toxin, 24, **25**
hydroxyphaseollin, on soybean, ultraviolet irradiation induced, 606
pisatin, induced in pea by Fusarium solani, 784

pisatin & phaseollin, differential sensitivity of fungi to, 1477
potato tubers, steroid glycoalkaloid vs. rishitin accumulation, 821
sativin & vestitol, in birdsfoot trefoil, 199
in soybean, ultraviolet irradiation induced, 606
Phytophthora spp.
cytoplasmic ribosomes & ribosomal RNA in, 1148
zoospores of, chemotactic response in, 1511
capsici, oospore germination of, cytology of dormancy, 1218
cinnamoni
on avocado, Dexon for control, 267, **269**, **271**
on pine, relation to ectomycorrhizae, 18
fragariae, zoospores produced in, 1081
infestans
computer program for forecasting blight, 205
interplot interference in field, 1269
on potato clones, resistance related to glycoalkaloid, 801
on potato tubers, rishitin vs. steroid glycoalkaloid accumulation of, 821, 826, [1322]
megasperma
on alfalfa
detection in Wisconsin fields, 1374
resistance to, 1216
screening technique for, 1185
growth & reproduction in, CO_2 & O_2 effects on, 1053
oospore germination of, enzymatically induced, 1083
in soybean, development in roots, 1168
parasitica
on cotton, boll rot from, 896, **897–899**
isolation from soil, use of citrus leaves, 540
parasitica nicotianae
on tobacco
peroxidase activity & heat-induced susceptibility in, 805
soil factors affecting, 802
palmivora
chlamydospore production in, 559, **560**
mating types of, 663
Picea spp., white- & brown-rot fungi in, chemical changes induced in, 1338
glauca, salt injury to, 200
sitchensis, Polyporus versicolor on, decay test with soil-blocks, 235
Pierce's disease
on grapevines, antibiotics for, 443
rickettsia related to, heat therapy for, 341
Pilowsky, M., (1542)
Pinckard, J. A., (315), 896, (1095), (1181)
pine (see also **Pinus spp.**)
loblolly, Cronartium fusiforme on, role of wounds, 446
slash, fusiform rust on, losses from, 447
Virginia (see **Pinus** virginiana)
Pinkas, Y., 1166
Pinus spp. (see also **pine**)
decay resistance in sodium hydroxide- & ammonia-treated wood, 57
Fomes annosus on, occurrence in Alabama, 1424
salt injury to, 200
white- & brown-rot fungi on, chemical changes induced in, 1338
echinata, ectomycorrhizae of, relation to Phytophthora, 18
monticola, Cronartium ribicola on bark of, electron microscopy of, 1420, **1421**
nigra, Dothistroma pini on, infection in Nebraska, 1060
ponderosa
Dothistroma pini on, infection in Nebraska, 1060
Meloidogyne sp. vs. ectomycorrhizae, histopathology of, 1034, **1036–1038**
Peridermium harknessii on, aeciospore dispersal, 170
strobus, Lophodermium pinastri on, 202
taeda (see also **pine**, loblolly)
Cronartium fusiforme on, monoterpene relation, 551
virginiana
ozone sensitivity to, plant age effect, 381
roots of, air & methane effects on, 805
Pirone, T. P., (910)
pisatin (see **phytoalexin**)
Pisum sativum (see **pea**)
Pisolithus tinctorius, on Pinus echinata, reaction to Phytophthora, 18
Pistia stratioites, Rhizoctonia solani on, pathogenicity to, 681
plantago mottle virus, tymovirus group member, new, 1313, **1314**
Plasmopara halstedii, on sunflower, streptomycin effect on, 200
Plavsic-Banjac, B., 206
Poa pratensis
Erysiphe graminis on, benzimidazole strain to, 1366
Helminthosporium sorokinianum on, vacuum method for leaf inoculation of, 1265
Helminthosporium triseptatum on, 804
Polach, F. J., 1189
Politis, D. J., 447
pollution, air-
air factors & distance from source, 805
from nitrated product source, effect on forest trees, 806
oxidant, suppression on bean by fungicides, 204
ozone
on bean, relation to Botrytis, 204
on bean & spinach, injury reduced by anti-senescent compounds, 903
benomyl relations in bean plants, 1539
effect on P level in bean, 206
on Phaseolus vulgaris, 200
pine sensitivity to, plant age effects, 381
to Virginia pine, 371
on wheat, affected by rust, 609
wheat stem rust fungus affected by, 397
peroxyacetyl nitrate, petunia response to, 201
polygalacturonase (see **enzymes**, specific)
Polyporus spp., on birch, lignin degradation related to polysaccharides, 1504
glomeratus, on maple, in relation to decayed wood, 200
hispidus, spore dissemination from trees, 445
versicolor
on 5 conifers, chemical changes induced by, 1338
effect on decay of Sitka spruce & sweetgum, in soil-block test, 235
Populus tremuloides, Hypoxylon mammatum on, germination & growth, 201
Poria monticola
on 5 conifers, chemical changes induced in, 1338
resistance to, in pine & sweetgum by chemical treatment of wood, 57
postharvest decay, fungi of, control by acetaldehyde vapor, 544
postharvest diseases
apple decay by Penicillium & Physalospora, diphenol oxidase activity in, 1115
oranges to green mold, development of, 1104
rusty brown discoloration of lettuce, virus cause, 1191, **1193**
potassium, deficiency of, in Ficus elastica, fertilizer applications for, 1084
potassium azide (see **fungicides**, specific)

potato
Alternaria solani on, resistance affected by alkaloids, 303
extracts from, bacterial growth inhibited by, 942
Fusarium spp. of, chemicals for, 203
late blight of, computerized forecasts of, 203, 205
Phytophthora & Helminthosporium on tubers, rishitin vs. steroid glycoalkaloid accumulation in, 821
Phytophthora infestans on glycoalkaloid relation, 801
interplot interference detection & measurement, 1269
tuber slices of, rishitin & steroid glycoalkaloid relations, 826, [1322]
Pseudomonas solanacearum on, resistance to, in phytotron, 1435
purple-top wilt of, electron microscopy, 204
Streptomyces scabies on, soil moisture relation to control, 1215
potato scab, electron microscopy of Streptomyces from, 205
potato virus X
hypersensitive reaction in, ultrastructure of, 1214
protoplasts infected with, 1125, **1127**, **1128**
potato virus Y
on tobacco
TMV interaction, 697
veinal-necrosis strain in, 442
potato yellow dwarf virus, purification of, polyethylene glycol for, 692
Potter, J. W., (577)
Powell, D., (851)
Powelson, R. L., (13), (287), (981), (984), (1216)
Powers, H. R., Jr., (446), 447
Pratt, R. G., 1374
Pratylenchus penetrans
on bean, Fusarium relation, 749
interaction with Meloidogyne & Helicotylenchus on tomato in culture, 805
population densities in, relation to vegetable crop loss, 577
principles of plant pathology, II, 1324
Pring, D. R., 393
Probasco, E. G., 1217
protease (see **enzymes**, specific)
Provvidenti, R., 196, (208)
Prunus
avium, albino disease of, prokaryotic-like structures in, 1216
persica (see **peach**)
Prunus necrotic ringspot virus
from hop, isolate variation in, 1217
on rose, serological properties of, 238
Pseudomonas spp.,
resistance to carbenicillin, 1217
transfer of R-factor by, 1217
aeruginosa, on potted ornamental plants, introduction into hospitals, 1215
glycinea, on soybean, relation to yellow bacteria on leaves & buds, 752
pisi
homoserine tolerance by, resistance role of, 301
on tobacco & soybean, ammonia production compared, 241
savastanoi, on olive, appraisal & loss from, 1064
solanacearum
field soil infected by, 445
growth inhibited by potato extracts, 942
on potato, resistance to, 1435
infesting soil with, procedure for, 799
syringae, epiphytic on soybean plants, **1464**
tabaci, on tobacco & soybean, ammonia production compared, 241
viridiflava, on chrysanthemum, leaf disease in, 1219
Pseudotsuga menziesii, Fusarium root rot of, in seedling nurseries, 337
Puccinia
arachidis, on peanut, relation to Cercospora, fungicides for, 668, **671**
carthami, on safflower, teliospore germination affected by volatiles, 795
coronata, on oats, RNA metabolism in leaves of, 491
graminis, on wheat, vertical spore concentrations in field, 211
graminis tritici
axenic culture of, mycelial suspension used for, 653
equations for rust development on wheat, 348
ozone effect on, 397, 609, **610**
pelargonii-zonalis, on geranium, hot-water therapy for, 273
recondita
on wheat
relation to Erysiphe graminis, 183
vertical spore concentrations in field, 211
recondita tritici
wheat resistance to, 346
on wheat, specificity of, 524, **526**
substriata indica, on pearl millet, new rust in SE USA, 449
sorghi, inter- & intracellular hyphae, ultrastructure of, 281, **284**, **285**
striiformis
overwintering & dispersal of, in Oregon, 13
races of, aggressiveness in, 699
Puffingberger, C. W., 804
Puhalla, J. E., 1488
Purcifull, D. E., (208)
Putt, E. D., (1517)
Pyracantha, Fusarium wilt of, 445
Pyricularia oryzae, N fertilizer effects, biochemical processes, 1202
Pyrus communis (see **pear**)
Pythium spp.
isolation methods for, 803
on peach, nematode relation in roots of, 994, **995**
pyruvate carboxylase (see **enzymes**, specific)
aphanidermatum
disease incidence & oospore germination in, effect of soil water, 1496
medium for isolation of, 1215
oospore germination in, 133, **136**
N, effects, 441
in soil, 1218
oospores & sporangial germination in, 1493, **1494**
propagule nature & density in soil, 1499, **1500**
streptomycin inhibition of, role of Mg & Ca, 34
irregulare, growth & reproduction of, CO_2 & O_2 effects on, 1053
myriotylum, on peanut, damping-off caused by, 1544

Quercus spp.
Ceratocystis fagacearum on
amino acid relation to wilt, 801
biological control in Arkansas, 1027
compatibility types of, 803
rubra, Ceratocystis fagacearum on, leaf abscission anatomy from, 252, **253**, **255**

Raabe, R. D., (1218)
Radewald, J. D., 1217
radish, Rhizoctonia solani on, epidemiology of, 1214
Rahe, J. E., 572
Rai, P. V., 1217
Rambo, G. W., 936

Ramsdell, D. C., 830, 959
Ramulispora sorghi, overwintering capacity of, 1530
raspberry, tomato ringspot virus on, nematode transmission in, 202
raspberry bushy dwarf virus, on Rubus spp., properties of, 780
Ravenscroft, A. V., (1198)
resistance
alfalfa
to bacterial wilt, 760
to Phytophthora megasperma, 1185
apple to scab, hypersensitivity, 363
bean to bean yellow mosaic virus, 196
chrysanthemum to Fusarium wilt, symptomatology, 1435
cotton
to boll rot, 315, **317**
to Rhizoctonia & Verticillium, factors, 352
cucumber to anthracnose, 442
flax to rust, new genes for, 777
grape to powdery mildew, 199
Helianthus to Verticillium wilt, in North America, 1517
maple to Verticillium wilt, 673
oats to crown rust, RNA relation, 491
peas to seed-borne mosaic virus, inheritance to, 1130
pepper to Xanthomonas vesicatoria tomato strain, hypersensitivity in, 915
pine to fusiform rust, monoterpene relation, 551
potato
to Alternaria solani, alkaloid role, 303
to Pseudomonas solanacearum, 1435
Sitka spruce to Polyporus versicolor in soil-block test, 235
sorghum to Trichometasphaeria turcica, 1214
sugar beet
to beet mosaic virus, inheritance of, 877
to beet yellows & beet western yellows viruses, 621
sugarcane to maize dwarf mosaic virus, 442
sweetgum to Polyporus versicolor in soil-block test, 235
tobacco
to Alternaria alternata, 806
to etch virus, 805
to potato virus Y, 442
tomato
to bacterial canker, 773
to fruit pox & gold fleck, 1285
to Stemphylium spp., 1542
to target leaf spot, 837, **838**
Vigna sinensis to 413 bacteria, 1099
wheat
to leaf rust, 346
to mildew, factors affecting, 1307
to powdery mildew, slow-mildewing resistance in, 867
to Puccinia recondita, specificity, 524, **526**
to Septoria leaf blotch, 1087
to stripe rust, races, 699
Reynolds, P. E., 206
Rhizoctonia solani
on aquatic plants, pathogenicity to, 681, **683**
on bean
control by PCNB in plants, 808, **811, 812**
host tissue colonized by, 1024
on carrot, temp & maturity factors affecting, 276, **279**
on cotton
histochemistry of infection, 157, **158, 160**
Trifluralin effect on, 651
Verticillium albo-atrum relation, factors, 352
growth & reproduction of, CO_2 & O_2 effects on, 1053
heterokaryon formation in, medium for, 542
mycelial constituents conserved in, 602
on radish, epidemiology of, 1214
on sugar beet, histopathology of root infection, 123, **125**
volatiles from decomposing materials on, 803
Rhizopus stolonifer, on sweet potato, ultrastructure & histochemistry in, 1218
Rhopalosiphum padi, barley yellow dwarf viruses transmitted by, 1317
rice
aflatoxin on, role of Aspergillus chevalieri & A. parasiticus, 1507
Helminthosporium leaf blight of, enzyme relations, 448
stem rot of, symptoms & losses from, 518, **519**
Rich, A. E., (167), (200)
Rich, S., (208), 657, (903)
rickettsia or rickettsialike organisms
alfalfa dwarf relation, heat therapy for, 341
clover club leaf disease caused by, evidence for, 1139, **1141–1144**
in peach with phony disease, 1217, 1422, **1423**
on peach, ultrastructure of organisms, 1275, **1276, 1277**
Pierce's disease of grapevines associated with, heat therapy for, 341, **343, 344**

Smith, W. H., (206)
Snyder, W. C., (562), (1435)
Sobers, E. K., 191, 193, 448
soilborne fungi, water stress role, 451
soil moisture, Pythium disease incidence & oospore germination affected by, 1496
Solanum tuberosum (see **potato**)
Solel, Z., 505, (1166)
Somasekhara, K. V., 448
sorghum
Fusarium & Sclerospora association, 197
maize dwarf mosaic virus on, panicle necrosis & small seed from, 388, **390, 391**, [944]
sooty stripe of, overwintering capacity of pathogen, 1530
Sorghum halepense, host for corn stunt, 440
Soulen, D. M., (1404)
southern bean mosaic virus
on cowpea, multiplication & pathogenesis in double infections, 1380
dissociation of, factors affecting, 629
soybean
bacteria pathogenic to seedlings of, 1464
bacterial blight of, biological control
for, 752
with Bdellovibrio, 400
brown stem rot of, relation to floral induction, 447
Cercospora kikuchii on
germination affected by, 1021
purple seed stain caused by, 796
Diaporthe phaseolorum on, germination affected by, 1021
fungicide uptake by, in seeds, 1532
growth of, axenic vs. contaminated plants, 1501
Heterodera glycines on, ultrastructural changes in, 76, **77, 78, 80–83**
Macrophomina phaseoli on, culture characteristics, 934, **936**
phytoalexin in, ultraviolet irradiation induced, 606
Phytophthora root rot of, development of, 1168, **1170**
Pseudomonas tabaci & P. pisi on, ammonia production in, 241
root nodules of, soybean mosaic virus infection in, electron microscopy of, 1011, **1012–1016**
tobacco ringspot virus of, translocation in, 442, 1291, **1295–1298**
soybean mosaic virus, soybean root nodules infected with, electron microscopy of, 1011, **1012–1016**
Spalding, D. H., 231, (449), 840
Sparapano, L., (1077)
Spencer, J. A., (445), 449, 864
Sphacelotheca reiliana, teliospores of & infection time, 1215
spinach, ozone injury to, anti-senescent compounds for, 903

spinach yellow dwarf virus, purification & host range of, **538**
Spinacia oleracea (see **spinach**)
spiroplasma (see also **mycoplasma**)
corn stunt disease associated with, 403, **404–406**
spore germination
Botrytis cinerea, pollen effects on, 1431
endogenous inhibitors of, 1326
fungistasis in 17 fungi in soil, 334
Helminthosporium turcicum, corn leaf diffusates inhibiting, 1393
Spurr, H. W., Jr., 806
squash mosaic virus
seed transmission frequency, 918
serological comparison of six biotypes from, 920, **923**
St. Augustine decline, characterization of virus causing, 444
Stace-Smith, R., (50), (566)
Stadelbacher, G. J., (544)
Stall, R. E., (1260)
Stanghellini, M. E., 133, 1218, 1493, 1496, (1499)
Staples, R. C., 207, (653)
Statler, G. D., 347
Stavely, J. R., 495, 806
Stemphylium spp., on tomato, resistance to, 1542
Stenotaphrum secundatum, sugarcane mosaic virus of, resistance in, 162
Stephenson, L. W., 1218
Stevenson, J. A., (1213)
Stevenson, W. R., 1346, 1467
Stipes, R. J., 735, (801), (804), 806
Stoessl, A., 1225, (1537)
stone fruits (see **Prunus spp.**)
Stone, L. L., (805), 806
Stouffer, R. F., (1414)
Strandberg, J., 998
strawberry
Alternaria tenuissima on, fruit rot from, 938
benomyl for diseases of, distribution & metabolism in plants, 890
Colletotrichum fragariae on Cassia, 533
fruit rot of, Dendrophoma cause, 419
Pestalotia fruit rot of, 443, 862, **863**
Streptomyces spp.
electron microscopy of, 205
Fusarium root rot of Douglas fir affected by, 337
scabies, soil moisture relation to control, 1215
Strobel, J. W., (1285)
Sturgeon, R. V., Jr., (450)
Stuteville, D. L., (1417)
Subirats, F. J., (448), 449
sugar beet
beet mosaic virus in, inheritance of resistance to, 877
beet yellows & beet western yellows viruses on, resistance to, 621
Fusarium oxysporum on, stalk blight from, 1216
Heterodera schachtii on, life cycle, 199
Phoma storage rot of, sucrose & cell wall factors affecting, 480
Rhizoctonia solani on, histopathology of, 123, **125**
sugarcane
Curvularia senegalensis on, isolation & factors affecting pathogenicity, 1541
maize dwarf mosaic virus of, varieties of, 442
sugarcane mosaic virus
on St. Augustine grass, resistance of, 162
on sugarcane & grasses, maize dwarf mosaic virus mixtures with, 1300
sugar maple (see **Acer** saccharum)
Sumner, D. R., 449, 857
Sun, M., 1398
sunflower (see **Helianthus spp.**)
Sutton, J. C., (1157)
sweet potato
Rhizopus stolonifer on, ultrastructure & histochemistry of, 1218
viruses of, mechanical transmission in, 377, **378**
Szkolnik, M., 207, 208, (1433)

Taber, R. A., (447)
Tainter, F. H., 1027
Talmadge, J. E., (801)
Tani, T., 491
Tang, H., 1218
Tattar, T. A., 167
Taylor, G. S., 208
TeBeest, D., 252
techniques
aphid trapping, for aphid-transmitted viruses in pepper, 1207
apple hypocotyl for scab research, 363
electron microprobe for exchange of materials between host & pathogen, 689
gel diffusion tests, interpretation of, 439
Helminthosporium sorokinianum, vacuum method for leaf inoculation of bluegrass, 1265
inoculation method, corn with Erwinia, 658
leaf bioassay for Helminthosporium toxin, 729, **731**
media, selected for Macrophomina, 613
medium for Cephalosporium gramineum detection in soil, 1198
microsyringe for propagule concentration, 1206
mobile nurseries for powdery mildew on barley, 1330
nematodes in soil, molasses for extraction of, 447
quantitative interference microscopy, in infected cells, 446
rust infection diagnosed in conifers, 445
for Sclerotium rolfsii in soil, flotation-sieving method, 447
temperature-gradient plate, for fungus growth & sporulation, 287
uranyl acetate in electron microscopy, 797, **798**
vacuum storage of plant pathogens, 804
temperature (see also **physiology of disease** and **physiology of microorganisms**)
Coprinus lagopus affected by, 206
Curvularia senegalensis, spore germination & pathogenicity, 1541
Fusarium infection of corn, 1288
Helminthosporium maydis, on corn seedlings, 138
ozone effect on pine, 371
Rhizoctonia on carrot, 276, **279**
stubborn disease of citrus, mycoplasma relation, 256
Verticillium wilt of cotton affected by, 953, **956, 957**
Temple, S. H., 953
Tephrosia vogelii, peanut stunt virus on, purification procedure in, 93, **94, 95**
Tetranychus urticae, benomyl for control of, accumulation of, 814
Theobroma cacao, Fusarium rigidiuscula on, mating type & pathotype linkage, 1435
thiabendazole (see **fungicides**, specific)
thiophanate (see **fungicides**, specific)
thiophanate-methyl (see **fungicides**, specific)
thiouracil, alfalfa mosaic virus infectivity & nucleoprotein changes in, 1235
Thomas, C. E., 538
Thomas, D. L., 1435
Thomas, P. E., 1218
Thompson, S. S., Jr., (546)
Tilletia
caries

electron microscopy studies in, 1216
teliospore germination in, physiology of, 643, [1212]
controversa, electron microscopy studies in, 1216
Tillman, R. W., 219, (448)
Timian, R. G., 109
Tipton, C. L., (640)
tobacco
Alternaria alternata on
lesion development & sporulation of, 803
resistance to, 806
Alternaria & Colletotrichum on, wound effect on growth, 495
black shank of, soil factors affecting, 802
etch virus of, resistance to, 805
false broomrape tumor of, 546
growth affected by N oxides, 804
ozone fleck on, role of benomyl & carboxin in, 208
Phytophthora parasitica on, peroxidase activity & heat effects on, 805
potato virus Y on, veinal-necrosis strain, 442
potato virus Y & TMV on, interaction, 697
Pseudomonas tabaci & P. pisi on, ammonia production in leaves of, 241
tobacco etch virus, pinwheel inclusions in, conformation of, 1214
tobacco mosaic virus
aphid transmission of, role of mouthparts, 1343
foliar protectants for control of, 1428
on Fraxinus americana, 203
infectivity of protein from, 1215
mutant of, host range & purification of, 906, **907**
particles resembling, in 5 rusts & 2 powdery mildews, 1111
preservation of, by preparative procedures, 1003, **1005–1008**
on tobacco, potato virus Y interaction, 697
uranyl acetate use in electron microscopy, 797, **798**
tobacco necrosis virus, uranyl acetate use in electron microscopy, 797, **798**
tobacco ringspot virus
ash strain of, virulence, 202
retention by Xiphinema americanum, 324
satellite of, transmission by Xiphinema americanum, 1429
in soybean
translocation of, 442
transmission by Xiphinema americanum, 1429
Toler, R. W., (440), (444)
Tolin, S. A., (801), 806
tomato
benomyl translocation in, for mildew control, 814, **815**
Corynespora cassiicola, inheritance of resistance to, 837, **838**
Corynebacterium michiganense on
bacteriophage for identification of, 1398
resistance to, factors affecting, 773
curly top virus in, resistance factors to, 1218
fruit pox & gold fleck syndromes of, 1285
fruit rot of, control of, 440, 444
Fusarium oxysporum on, chemicals related to injury & wilt, 655
Meloidogyne incognita on
biotypes of, 803
root pressure effect, 199
nematode interaction in culture, 805
root knot nematode on, phenol & root necrosis relation, 329
Stemphylium spp. on, resistance of cultivars to, 1542
Verticillium albo-atrum on, phenol relation, 203
Xanthomonas vesicatoria on, serotypes unrelated to pathotypes, 1260
tomato ringspot virus
on peaches, stem pitting induced in, 1404, **1405**
on raspberry, nematode transmission of, 202
Tomlinson, H., 208, 903
Townsend, A. M., 673
toxin (see also **phytoalexin**)
aflatoxin
in peanut, DMSO treatment for, 936
on rice, competition of Aspergillus spp. in, 1507
crop residue extracts, to peanut & Sclerotium rolfsii, 70
from Helminthosporium maydis, electrolyte leakage induced by, 640
from Helminthosporium spp., effect on membrane permeability in plants, 226
on pea, Aspergillus ruber relationship, 46, [944]
from Phyllosticta maydis, specific for male-sterile corn, 1357, 1361
tentoxin, from Alternaria tenuis, effect on stomata in bean, 1077
victorin-treated beans, relation to TMV, 449
Toya catilina, African cereal streak vector, new disease in East Africa, 1407
Tremaine, J. H., (566)
triarimol (see **fungicides**, specific)
Trichoderma spp.
Armillaria mellea interaction with, methyl bromide effects on, 965, **971**
Physalospora obtusa suppressed by, 205
viride, growth on agar, effect of fumigants on, 1352
Trichometasphaeria turcica, in sorghum, genetics of resistance to, 1214
Trifluralin, effect on Rhizoctonia solani on cotton, 651
Trifolium
incarnatum, clover club leaf disease of, symptom remission with penicillin, 44, **45**
pratense, diseased root-insect relation, 428
Trione, E. J., 643
True, R. P., 806
Truter, S. J., (281)
Tschanz, A. T., 208
Tseng, T. C., 208
Tsuchizaki, T., 634
Tsuga heterophylla, white- & brown-rot fungi on, chemical changes induced in, 1338
Tu, J. C., 1011
Tung, G., (205)
turfgrass, nematodes on, nematicides for, 204
Tweedy, B. G., (686)
Tylenchorhynchus dubius, on turfgrass, 204
Tylenchulus semipenetrans, on citrus, control with foliar sprays, 1217
Typhula idahoensis, basidiospores of, role in snow mold, 115

Uchytil, T. F., (1077)
Ulmus
americana
benomyl effect on growth of, 85
Ceratocystis ulmi on
infection localized in, 207
water relations, 98
hollandica, Ceratocystis ulmi on, mating reaction, 202
ultrastructure (see also **electron microscopy**)
Colletotrichum in corn leaves, 447
Helminthosporium maydis in corn leaves, 296, **298**, **299**
Hemileia vastatrix & Puccinia sorghi, 281, **282**, **284**, **285**
soybean infected with Heterodera glycines, 76, **77**, **78**, **80–83**
witches'-broom of Dicentra, mycoplasmalike bodies in, 88, **91**
Uncinula necator, on grape, resistance to, 199

Unwin, C. H., (1225), (1537)
Upham, P. M., 814
Uromyces phaseoli
benomyl for systemic control of, 814, **816**
virus particles in, electron microscopy of, 1111, **1113**
Ustilago
maydis
growth & metabolism of, chloroneb effects on, 219
killer system in, heterokaryons & determinants in, 1017
spore germination in, lipid metabolism during, 1219
viruslike particles in, heterokaryon transfer of, 1019, **1020**
striiformis
on Agrostis palustris, control by apical dominance, 146
growth induced by benomyl, 1074
Uyemoto, J. K., 208, 797

Vaccinium corymbosum
Alternaria tenuissima on, new leaf disease of, 1395, **1396**
Gloeosporium leaf spot of, histopathology, 320, **322**
viruslike particles in, electron microscopy of, 432, **433**, **435**
Vago, C., (791)
Vakili, N. G., (1435)

Vardaro, P. M., (204), (1415), (1539)
Vargas, J. M., Jr., 1366
Veech, J. A., (1393)
vegetation, in New Jersey, diseases of, 201
Venturia
inaequalis
on apple, fungicides for, 207, 208
on detached apple leaves, 649
dodine tolerance in, genetic control of, 1189
pirina, races of, on pear, 41
Verticillium spp.
on Fraxinus spp., 201
ultraviolet light sensitivity, 1488, **1491**
albo-atrum
CO_2 fixation in, enzymes catalyzing, 947
on cotton
endopolygalacturonase relation, 62, **63**
relation to Meloidogyne incognita on, 485
Rhizoctonia relation, factors affecting, 352
systemic fungicides for, 1091
water, pH, & temp effects, 413
inoculum density & propagule size of, effect of milling on, 1214
on tomato, phenols in, 203
dahliae
on cotton, temp & moisture effects, 953, **956**, **957**
on mint, effect of light on, 1217
in peppermint, propane gas flaming for inactivation of, 172
on red maple, tolerance to, 673
on sunflower
inoculation methods in, 1521
resistance to, in North America, 1517
malthousei
benomyl & zineb tolerance to, 203
on mushrooms, occurrence in steam-treated soil, 1368
pathogenesis of, benomyl influence, 209
Vicia faba
Botrytis cinerea vs. ozone, 204
stomata affected by Alternaria tenuis toxin, 1077, **1078**
victorin (see **toxin**)
Vieau, R., (1239)
Vigna
sinensis
bacteria pathogenic to, 1099
chlorotic mottle & southern bean mosaic viruses in double infections on, multiplication & pathogenesis of, 1380
unguiculata, cowpea virus on, seed-borne, host range of, 208
viruses (see also **bacteriophage, mycovirus,** by common name, and under hosts)
cacti, distribution & electron microscopy, 1133, **1134–1138**
detection of, by serologically specific electron microscopy, 441
double infections in cowpea, multiplication & pathogenesis, 1380
electrophoresis of, with agarose-acrylamide gels, 1216
heat treatment, for raspberry viruses, 780
hypersensitivity altered by thiouracil, 1235
inbreeding of leafhopper for increased transmission efficiency, 109
indexing of, by callus cultures of chrysanthemum, 37
inoculations of, quick drying vs. washing, 72
line pattern & ringspot symptoms, on birch, 1470, **1472**
NEPO virus group, characterization in Euonymus, 804
soil-borne wheat mosaic, comparisons of isolates, 634, **635**
stunting disease of alligatorweed, 443
of sweet potato, mechanical transmission in, 377, **378**
terminology, 1328
especially viroid, 438
transcapsidation, in 2 barley yellow dwarf viruses, 1317
tymoviruses, plantago mottle virus new member of, 1313
Vitis vinifera (see **grape**)

CONTENTS OF VOLUME 63, 1973

No. 1 – JANUARY

Author's Guide 1

Ruth Allen Award 6

Fellows of The American Phytopathological Society 7

The oversummering and dispersal of inoculum of Puccinia striiformis in Oregon . . G. SHANER and R. L. POWELSON 13

Growth of ectomycorrhizal and nomycorrhizal Shortleaf Pine seedlings in soil with Phytophthora cinnamomi
D. H. MARX 18

Role of host-selective toxin in colonization of corn leaves by Helminthosporium carbonum
J. C. COMSTOCK and R. P. SCHEFFER 24

Mycoplasmalike bodies found in phloem of Black Locust affected with witches'-broom
C. E. SELISKAR, C. L. WILSON, and C. E. BOURNE 30

Streptomycin inhibition of Peronospora parasitica and its host reversed by manganese and calcium . . .D. MC MEEKIN 34

Virus indexing of callus cultures of Chrysanthemum morifolium by tissue implantation and mechanical inoculation
J. BEN-JAACOV, R. K. HORST, C. M. GEISSINGER, A. W. DIMOCK, and R. W. LANGHANS 37

Pathogenesis and host-parasite relations of the cyst nematode, Heterodera graminophila, on grasses . . W. BIRCHFIELD 38

Physiological races of Venturia pirina on pear . . . . . .E. SHABI, J. ROTEM, and G. LOEBENSTEIN 41

Remission of symptoms of clover club leaf following treatment with penicillin . . .I. M. WINDSOR and L. M. BLACK 44

Deterioration of stored pea seed by Aspergillus ruber: partial purification and characterization of a toxin to peas
G. E. HARMAN 46

Clover yellow mosaic virus from apple trees with leaf pucker disease M. F. WELSH, R. STACE-SMITH, and E. BRENNAN 50

Source of increased decay resistance in sodium hydroxide- and ammonia-treated wood . . . . . .T. L. HIGHLEY 57

Endopolygalacturonase: evidence for involvement in Verticillium wilt of cotton . . . . . H. W. MUSSELL 62

Toxicity of crop residue to peanut seed and Sclerotium rolfsii . . . . . H. W. BOYD and D. V. PHILLIPS 70

Quick drying versus washing in virus inoculations . . . . . C. E. YARWOOD 72

Ultrastructural changes in Peking soybeans infected with Heterodera glycines . R. D. RIGGS, K. S. KIM, and I. GIPSON 76

The effect of Benomyl on the growth of American Elm seedlings B. R. ROBERTS, W. K. HOCK, and L. R. SCHREIBER 85

Mycoplasmalike bodies associated with witches'-broom of Bleeding Heart . . . . . C. HIRUKI and P. SHUKLA 88

Improved purification procedure for peanut stunt virus, incitant of Tephrosia Yellow Vein disease
H. E. WATERWORTH, R. L. MONROE, and R. P. KAHN 93

Water relations in American Elm infected with Ceratocystis ulmi . . . . . W. E. MAC HARDY and C. H. BECKMAN 98

Fertilization and wheat refuse effects on Fusarium species associated with wheat roots in Minnesota
H. L. WARREN and T. KOMMEDAHL 103

Selective inbreeding of Macrosteles fascifrons for increased efficiency in virus transmission . . R. G. TIMIAN and K. ALM 109

Association of mating type and virulence in Helminthosporium maydis, and observations on the origin of the Race T population in the United States . . . . . K. J. LEONARD 112

Role of basidiospores as propagules and observations on sporophores of Typhula idahoensis
B. M. CUNFER and G. W. BRUEHL 115

Phaseolus lathyroides as a reservoir of cowpea mosaic virus in Puerto Rico . . . . R. ALCONERO and A. SANTIAGO 120

Histopathology of resistant and susceptible sugar beet roots inoculated with Rhizoctonia solani . . . . E. G. RUPPEL 123

Differential transmission of Mississippi and Ohio corn stunt agents by Graminella nigrifrons
M. M. CHOUDHURY and E. ROSENKRANZ 127

Germination in vitro of Pythium aphanidermatum oospores . . . . . M. E. STANGHELLINI and J. D. RUSSELL 133

Effect of temperature and fungicides on survival of corn grown from kernels infected with Helminthosporium maydis
T. KOMMEDAHL and D. S. LANG 138

Purification, electron microscopy, and serology of the dogwood ringspot strain of Cherry Leafroll virus
H. E. WATERWORTH and R. H. LAWSON 141

Evidence for developmental control of Ustilago striiformis by apical dominance in perennially infected stolons of Agrostis palustris . . . . . C. F. HODGES 146

Serology, physical properties, and purification of unaggregated infectious maize dwarf mosaic virus W. G. LANGENBERG 149

Fusarium wilt of chrysanthemum: effect of nitrogen source and lime on disease development
S. S. WOLTZ and A. W. ENGELHARD 155

Initial host responses in cotton to infection by Rhizoctonia solani . . . . . A. R. WEINHOLD and J. MOTTA 157

Resistance of St. Augustine Grass to infection by sugarcane mosaic virus . . . . J. L. SALADINI and F. W. ZETTLER 162

Extractable phenols in clear, discolored, and decayed woody tissues and bark of sugar maple and red maple
T. A. TATTAR and A. E. RICH 167

Dispersal of aeciospores of Peridermium harknessii in Central Nebraska . . . . . G. W. PETERSON 170

Inactivation of Verticillium dahliae in peppermint stems by propane gas flaming . J. L. MC INTYRE and C. E. HORNER 172

Processes of sporulation in Alternaria solani and their response to metabolic inhibitors
R. J. LUKENS and J. G. HORSFALL 176

Relationship between incidence and severity of powdery mildew and leaf rust on winter wheat
W. C. JAMES and C. S. SHIH 183

Formation of microsclerotia of Cylindrocladium spp. in infected azalea leaves, flowers, and roots . . R. G. LINDERMAN 187

Stabilization of conidium morphology in cultures of Alternaria longipes . . . . E. K. SOBERS and B. DOUPNIK, JR. 191

PHYTOPATHOLOGICAL NOTES

Anthracnose of statice in Southern Florida . . . . . E. K. SOBERS and R. S. COX 193

Citrus likubin pathogens in salivary glands of Diaphorina citri
MING-HSIUNG CHEN, T. MIYAKAWA, and C. MATSUI 194

Resistance in Phaseolus vulgaris to the severe strain of bean yellow mosaic virus
R. PROVVIDENTI and W. T. SCHROEDER 196

Association of Fusarium moniliforme with infection of sorghum seedlings by Sclerospora sorghi . . . . . D. C. BAIN 197

No. 2 – FEBRUARY

Abstracts of the Thirty-Second Annual Meeting of the Northeastern Division of The American Phytopathological Society 199

Vertical spore concentrations of three wheat pathogens above a wheat field
M. G. EVERSMEYER, C. L. KRAMER, and J. R. BURLEIGH 211

Effect of Chloroneb on the growth and metabolism of Ustilago maydis . . . . . R. W. TILLMAN and H. D. SISLER 219

Membrane permeability in plants: changes induced by host-specific pathotoxins . . . .R. W. KECK and T. K. HODGES 226

In vitro and in vivo production of pectin lyase by Penicillium expansum . . D. H. SPALDING and A. A. ABDUL-BAKI 231

Influence of various initial moisture contents on decay of Sitka spruce and sweetgum sapwood by Polyporus versicolor in the soil-block test. . . . . C. A. PETERSON and E. B. COWLING 235

Serological properties of Prunus necrotic ringspot and apple mosaic virus isolates from rose . . . . . R. CASPER 238

Production of ammonia by tobacco and soybean inoculated with bacteria C. HURST, B. W. KENNEDY, and L. OLSON 241

Histochemistry of beta-glucosidase in isolines of Zea mays susceptible or resistant to northern corn leaf blight M. E. MACE 243

Infection of Juniperus virginiana and J. Scopulorum by Phomopsis juniperovora . . . . . .G. W. PETERSON 246

Anatomy of leaf abscission induced by oak wilt . . . . . D. TE BEEST, R. D. DURBIN and J. E. KUNTZ 252

Effect of temperature and pH on growth in vitro of a mycoplasmalike organism associated with stubborn disease of citrus A. E.-S. A. FUDL-ALLAH and E. C. CALAVAN 256

Survival of bean pod mottle and cowpea mosaic viruses in beetles following intrahemocoelic injections R. S. SANDERLIN 259

Action of oil in the control of citrus greasy spot . . . . . .J. O. WHITESIDE 262

Control of Phytophthora root rot of avocado with *p*-dimethylaminobenzenediazo sodium sulfonate (Dexon) G. A. ZENTMYER 267

Hot-water therapy for geranium rust control . . . . . D. J. PHILLIPS and A. H. MC CAIN 273

Effect of soil temperature and host maturity on infection of carrot by Rhizoctonia solani J. P. MILDENHALL and P. H. WILLIAMS 276

Haustoria and intracellular hyphae in the rusts . . . . . F. H. J. RIJKENBERG and S. J. TRUTER 281

A temperature-gradient plate designed to function near and below 0 C . . . . . R. C. ROWE and R. L. POWELSON 287

Aphanomyces blight of amazon sword plants . . . . . .W. H. RIDINGS and F. W. ZETTLER 289

Ultrastructural changes in corn leaves after inoculation with Helminthosporium maydis, race T J. A. WHITE, O. H. CALVERT, and M. F. BROWN 296

Tolerance of homoserine by Pseudomonas pisi and implications of homoserine in plant resistance . D. C. HILDEBRAND 301

Effect of potato alkaloids on the growth of Alternaria solani and their possible role as resistance factors in potatoes S. L. SINDEN, R. W. GOTH, and M. J. O'BRIEN 303

Interdependence of a mite, Siteroptes reniformis, and a fungus, Nigrospora oryzae, in the Nigrospora lint rot of cotton F. F. LAEMMLEN and D. H. HALL 308

Cotton boll cuticle, a potential factor in boll rot resistance . . . . . .S. C. WANG and J. A. PINCKARD 315

Histopathology of fleck and lesion symptoms on blueberry infected with Gloeosporium minus . . R. D. MILHOLLAND 320

Retention of tobacco ringspot virus by Xiphinema americanum . . . . . J. M. MC GUIRE 324

No. 3 – MARCH

Influence of inoculum dosage, time after wounding, and season on infection of Persian walnut trees by Erwinia rubrifaciens N. W. SCHAAD, M. G. HESKETT, J. M. GARDNER, and C. I. KADO 327

Free phenols and root necrosis in Nematex tomato infected with the root knot nematode C. H. BRUESKE and V. H. DROPKIN 329

Soil fungistasis: behavior of nutrient-independent spores and sclerotia in a model system S. C. HSU and J. L. LOCKWOOD 334

Fusarium root rot of Douglas-fir seedlings . . . . . .W. J. BLOOMBERG 337

Association of a rickettsialike organism with Pierce's disease of grapevines and alfalfa dwarf and heat therapy of the disease in grapevines . . . . . A. C. GOHEEN, G. NYLAND, and S. K. LOWE 341

Inheritance of resistance to leaf rust in Waldron wheat . . . . . G. D. STATLER 346

Equations for predicting wheat stem rust development . . M. G. EVERSMEYER, J. R. BURLEIGH, and A. P. ROELFS 348

Influence of Rhizoctonia solani on the susceptibility of cotton plants to Verticillium albo-atrum and on root carbohydrates F. Y. KHOURY and S. M. ALCORN 352

Influence of volatile compounds from alfalfa hay on microbial activity in soil in relation to growth of Sclerotium rolfsii R. G. LINDERMAN and R. G. GILBERT 359

Etiolated apple hypocotyls: a useful host tissue in apple scab research R. L. NICHOLSON, S. VAN SCOYOC, E. B. WILLIAMS and J. KUĆ 363

Sources of species of Fusarium in northern hardwood forests . . . . . T. C. WEIDENSAUL and F. A. WOOD 367

The influence of environmental factors on the sensitivity of Virginia pine to ozone . . . D. D. DAVIS and F. A. WOOD 371

Mechanical transmission of viruses from sweet potato . . . . . R. ALCONERO 377

The influence of plant age on the sensitivity of Virginia pine to ozone . . . . . D. D. DAVIS and F. A. WOOD 381

Occurrence of panicle necrosis and small seed as manifestations of maize dwarf mosaic virus infection in otherwise symptomless grain sorghum plants . . . . . L. K. EDMUNDS and C. L. NIBLETT 388

Isolation and characterization of oat blue dwarf virus ribonucleic acid D. R. PRING, R. J. ZEYEN, and E. E. BANTTARI 393

Effect of ozone on the wheat stem rust fungus . . . . . A. S. HEAGLE and L. W. KEY 397

Control of bacterial blight of soybean by Bdellovibrio bacteriovorus . . . . . R. H. SCHERFF 400

Spiroplasma: motile, helical microorganism associated with corn stunt disease . . . . R. E. DAVIS and J. F. WORLEY 403

Effect of Ethrel and Ceratocystis fimbriata on the accumulation of chlorogenic acid and 6-methoxy mellein in carrot root J. G. JAWORSKI, J. KUĆ, and E. B. WILLIAMS 408

In vitro interactions of Fusarium and Verticillium wilt fungi with water, pH, and temperature J. B. MANANDHAR and G. W. BRUEHL 413

A strawberry fruit rot caused by Dendrophoma obscurans . . . . . C. M. HOWARD and E. E. ALBREGTS 419

p-Fluorophenylalanine selectively inhibits sporulation of two wilt fungi . . . . . W. L. BIEHN 421

A conductivity assay for measuring virulence of Sclerotinia sclerotiorum H. C. NEWTON, D. P. MAXWELL, and L. SEQUEIRA 424

Attractiveness of diseased red clover roots to the clover root borer . . . . . K. T. LEATH and R. A. BYERS 428

Electron microscopy of viruslike particles from shoestring-diseased highbush blueberry, Vaccinium corymbosum L. J. X. HARTMANN, J. E. BATH, and G. R. HOOPER 432

Erratum 431

No. 4 – APRIL

Donald Stuart Welch, 1894-1972 . . . . . W. A. SINCLAIR 437

Letter to the Editor: comments on virus terminology and the "viroid" . . . . . H. H. MC KINNEY 438

Letter to the Editor: interpretations of gel diffusion tests . . . . . H. A. SCOTT 439

Abstracts for the 1973 Annual Meeting of the Southern Division of The American Phytopathological Society 440

Symposium on water stress: pathogenic induction and influence on metabolism and disease development 451
Influence of low plant and soil water potentials on diseases caused by soilborne fungi . . . . . R. J. COOK 451
Pathogen-induced changes in host water relations . . . . . J. M. DUNIWAY 458
Response of metabolism to low water potentials in plants . . . . . J. S. BOYER 466

Antagonism of Scytalidium isolates against decay fungi . . . . . A. E. KLINGSTRÖM and S. M. JOHANSSON 473

Sucrose and cell walls as factors affecting Phoma storage rot of sugar beet . . . . . W. M. BUGBEE 480

Effect of Meloidogyne incognita acrita on the susceptibility of cotton plants to Verticillium albo-atrum
F. Y. KHOURY and S. M. ALCORN 485

Effect of rust infection of oat leaves on cytoplasmic and chloroplast ribosomal ribonucleic acids
T. TANI, M. YOSHIKAWA, and N. NAITO 491

Comparative effects of Alternaria alternata infection and other leaf injuries on growth of tobacco
J. R. STAVELY and L. J. SLANA 495

Behavior of sclerotia of Sclerotium rolfsii produced in soil or in culture regarding germination, stimulation by volatiles, Fungistasis, and Sodium Hypochlorite treatment . . . . . R. G. LINDERMAN and R. G. GILBERT 500

Transcuticular movement of fungicides . . . . . Z. SOLEL and L. V. EDGINGTON 505

Occurrence and transfer of a biological factor in soil that suppresses take-all of wheat in eastern Washington
P. J. SHIPTON, R. J. COOK, and J. W. SITTON 511

Stem rot of rice in California . . . . . R. A. KRAUSE and R. K. WEBSTER 518

Specificity of the Puccinia recondita f. sp. tritici: Triticum aestivum 'Bulgaria 88' relationship . . . . L. E. BROWDER 524

Mycosphaerella zeae-maydis sp. n., the sexual stage of Phyllosticta maydis . . D. M. MUKUNYA and C. W. BOOTHROYD 529

Cassia obtusifolia, a possible reservoir for inoculum of Colletotrichum fragariae . . C. M. HOWARD and E. E. ALBREGTS 533

Infection rates of Cercospora apii in mixed populations of susceptible and tolerant celery . . . . . R. D. BERGER 535

PHYTOPATHOLOGICAL NOTES

Spinach yellow dwarf virus . . . . . C. E. THOMAS, R. S. HALLIWELL, and R. E. WEBB 538

Citrus leaf pieces as traps for Phytophthora parasitica from soil slurries . . . G. R. GRIMM and A. F. ALEXANDER 540

A medium for heterokaryon formation in Rhizoctonia solani . . . . . E. E. BUTLER and H. BOLKAN 542

The toxicity of acetaldehyde vapors to postharvest pathogens of fruits and vegetables
Y. AHARONI and G. J. STADELBACHER 544

Development of a normal tobacco plant from a false broomrape tumor
S. F. JENKINS, JR., P. D. DUKES, and S. S. THOMPSON, JR. 546

No. 5 – MAY

Germination of basidiospores of Fomes applanatus . . . . . T. S. BROWN, JR. and W. MERRILL 547

Monoterpene-fusiform rust relationships in Loblolly Pine . . . . . D. L. ROCKWOOD 551

Pathogenicity and further characterization of Calonectria crotalariae causing collar rot of papaya
W. T. NISHIJIMA and M. ARAGAKI 553

Production of chlamydospores by Phytophthora palmivora in culture media . . . . . J. Y. KADOOKA and W. H. KO 559

Use of morphology and mating populations in the identification of formae speciales in Fusarium solani
T. MATUO and W. C. SNYDER 562

Serological, physical, and chemical properties of strains of cherry leaf roll virus
D. G. A. WALKEY, R. STACE-SMITH, and J. H. TREMAINE 566

Phytoalexin in nature of heat-induced protection against bean anthracnose . . . . . J. E. RAHE 572

The relationship between population densities of Pratylenchus penetrans and crop losses in summer-maturing vegetables in Ontario . . . . . T. H. A. OLTHOF and J. W. POTTER 577

Development of Meloidogyne hapla in peanut . . . . . M. B. CASTILLO, C. C. RUSSELL, and L. S. MORRISON 583

Environmental factors regulating ascospore discharge by Mycosphaerella ligulicola . . R. E. MC COY and A. W. DIMOCK 586

Competitive saprophytic ability of Fusarium roseum f. sp. cerealis 'culmorum' in soil
R. F. NYVALL and T. KOMMEDAHL 590

Chlamydospore formation in Fusarium in sterile salt solutions . . . . . S. C. HSU and J. L. LOCKWOOD 597

Conservation of mycelial constituents in four sclerotium-forming fungi in nutrient-deprived conditions
C. CHRISTIAS and J. L. LOCKWOOD 602

Soybean phytoalexin, hydroxyphaseollin, induced by ultraviolet irradiation . . . M. A. BRIDGE and W. L. KLARMAN 606

Effect of Puccinia graminis f. sp. tritici on ozone injury in wheat . . . . . A. S. HEAGLE and L. W. KEY 609

Biology of Macrophomina phaseoli in soil studied with selective media
W. A. MEYER, J. B. SINCLAIR, and M. N. KHARE 613

Reaction of resistant and susceptible sugar beet cultivars to beet yellows and beet western yellows viruses
F. J. HILLS, R. J. SHEPHERD, and R. J. WAKEMAN 621

Purification of a protease secreted by Colletotrichum lindemuthianum . . . . . S. M. RIES and P. ALBERSHEIM 625

Factors affecting dissociation of southern bean mosaic virus . . . . . O. P. SEHGAL 629

Comparisons of soil-borne wheat mosaic virus isolates from Japan and the United States
T. TSUCHIZAKI, H. HIBINO, and Y. SAITO 634

Leakage from corn tissues induced by Helminthosporium maydis race T toxin
J. M. HALLOIN, J. C. COMSTOCK, C. A. MARTINSON, and C. L. TIPTON 640

The physiology of germination of Tilletia Teliospores . . . . . .E. J. TRIONE 643

Response of detached apple leaves to Venturia inaequalis
R. L. NICHOLSON, S. VAN SCOYOC, J. KUĆ, and E. B. WILLIAMS 649

PHYTOPATHOLOGICAL NOTES

Effect of the herbicide, Trifluralin, on Rhizoctonia disease in cotton
R. NEUBAUER and Z. AVIZOHAR-HERSHENSON 651

Use of mycelial suspension for increasing Puccinia graminis f. sp. tritici in axenic culture
H. W. MUSSELL and R. C. STAPLES 653

Chemically induced root injury correlated with a reduction of Fusarium wilt of tomato
W. L. BIEHN and A. E. DIMOND 655

Erratum 656

No. 6 – JUNE

A. E. Dimond, 1914-1972 . . . . . S. RICH and J. G. HORSFALL 657

An improved method for the inoculation of corn with Erwinia spp. . . . . .J. R. HARTMAN and A. KELMAN 658

Distribution of mating types of Phytophthora palmivora
G. A. ZENTMYER, D. J. MITCHELL, L. JEFFERSON, J. ROHEIM, and D. CARNES 663

Control of peanut leaf rust alone or in combination with Cercospora leaf spot . . . . . .A. L. HARRISON 668

Tolerance of half-sib families of Red Maple to Verticillium wilt . . . . . .A. M. TOWNSEND and W. K. HOCK 673

Xylem dysfunction in peach caused by Cytospora leucostoma . . . . . .M. C. HAMPSON and W. A. SINCLAIR 676

Pathogenicity of Rhizoctonia solani to aquatic plants . . . . . .B. G. JOYNER and T. E. FREEMAN 681

The effect of oxycarboxin on amino acid metabolism of Phaseolus vulgaris var. Pinto . L. C. NEWBY and B. G. TWEEDY 686

Use of the electron microprobe to measure exchange of materials between host and pathogen
J. C. COMSTOCK and R. P. SCHEFFER 689

Polyethylene glycol for purification of potato yellow dwarf virus . . . . . H. T. HSU and L. M. BLACK 692

Individual and combined effects of tobacco mosaic virus and potato virus Y on Burley tobacco . . . . R. C. SIEVERT 697

Physiologic specialization and pathogen aggressiveness in stripe rust . . . . . R. B. VOLIN and E. L. SHARP 699

Aerobiology of two peanut leafspot fungi . . . . . D. H. SMITH and F. L. CROSBY 703

Histopathology of Sclerotinia sclerotiorum infection of bean . . . . . R. D. LUMSDEN and R. L. DOW 708

Effects of strain, source plant, and temperature on the transmissibility of citrus tristeza virus by the melon aphid M. BAR-JOSEPH and G. LOEBENSTEIN 716

Purification of a mild mottle strain of peanut mottle virus . . . . . O. R. PAGUIO and C. W. KUHN 720

Histopathology of Marasmius blight of American Beachgrass . . . . . T. B. WARREN and L. T. LUCAS 725

Leaf bioassay for Helminthosporium carbonum toxin–search for phytoalexin S. E. HOFFMANN and F. P. ZSCHEILE, JR. 729

Control of Dutch elm disease in artificially-inoculated American Elms with soil-injected benomyl, captan, and thiabendazole . . . . . R. J. STIPES 735

Glycosidase activity and flavonoid accumulation in alfalfa infected by Ascochyta imperfecta A. F. OLAH and R. T. SHERWOOD 739

Growth stimulation of Armillaria mellea by ethanol and other alcohols in relation to phenol concentration C. P. VANCE and M. O. GARRAWAY 743

Effect of two plant-parasitic nematodes on Fusarium dry root rot of beans D. G. HUTTON, R. E. WILKINSON, and W. F. MAI 749

Bacterial blight of soybeans as influenced by populations of yellow bacteria on leaves and buds . . . R. H. SCHERFF 752

Soil fungistasis: evidence for an inhibitory factor . . . . . M. ROMINE and R. BAKER 756

Differences in anatomy, plant-extracts, and movement of bacteria in plants of bacterial wilt resistant and susceptible varieties of alfalfa . . . . . Y. S. CHO, R. D. WILCOXSON, and F. I. FROSHEISER 760

Enumeration of Fusarium oxysporum f. pisi race 5 propagules from soil . . . . . D. D. ROBERTS and J. M. KRAFT 765

Ear-rotting potential of Helminthosporium maydis race T in corn . . . . . O. H. CALVERT and M. S. ZUBER 769

Relation of age of plants, temperature, and inoculum concentration to bacterial canker development in resistant and susceptible Lycopersicon spp. . . . . R. L. FORSTER and E. ECHANDI 773

New genes for rust resistance in flax . . . . . D. E. ZIMMER and V. E. COMSTOCK 777

Occurrence and some properties of raspberry bushy dwarf virus in Rubus species in the United States . R. H. CONVERSE 780

Induction of pisatin formation in the pea foot region by pathogenic and nonpathogenic clones of Fusarium solani J. A. CHRISTENSON and L. A. HADWIGER 784

PHYTOPATHOLOGICAL NOTES

Viruslike particles associated with a disease of Chondrilla juncea . . . . S. HASAN, J. GIANNOTTI, and C. VAGO 791

Ballistics of Mycosphaerella ligulicola ascospore discharge . . . . . R. E. MC COY 793

Effect of volatile substances from safflower on germination of teliospores of Puccinia carthami . J. M. KLISIEWICZ 795

Effects of Cercospora kikuchii on soybeans . . . . . J. R. WILCOX and T. S. ABNEY 796

Uranyl acetate useful as a specimen supporting membrane on electron microscope grids J. K. UYEMOTO and D. K. HUMMER 797

A procedure for infesting field soils with Pseudomonas solanacearum . . . . . S. M. MC CARTER 799

No. 7 – JULY

Abstracts of the Thirtieth Annual Meeting of the Potomac Division of The American Phytopathological Society 801

Control of Rhizoctonia solani by pentachloronitrobenzene accumulated from soil by bean plants
P. R. BRISTOW, J. KATAN, and J. L. LOCKWOOD 808

Role of benomyl in the systemic control of fungi and mites on herbaceous plants . . . . P. M. UPHAM and C. J. DELP 814

Suppression of steroid glycoalkaloid accumulation as related to rishitin accumulation in potato tubers
M. SHIH, J. KUĆ, and E. B. WILLIAMS 821

Incorporation of ^{14}C from acetate and mevalonate into rishitin and steroid glycoalkaloids by potato tuber slices inoculated with Phytophthora infestans . . . . . M. SHIH and J. KUĆ 826

Reduction of Monilinia laxa inoculum potential in almond orchards resulting from dormant benomyl sprays
D. C. RAMSDELL and J. M. OGAWA 830

Inheritance of resistance in tomato to target leaf spot . . . . . F. A. BLISS, P. T. ONESIROSAN, and D. C. ARNY 837

Catabolite repression of polygalacturonase, pectin lyase, and cellulase synthesis in Penicillium expansum
D. H. SPALDING, J. M. WELLS, and D. W. ALLISON 840

Short-term population dynamics of Erwinia amylovora in succulent pear tissue . R. P. COVEY, JR. and W. R. FISCHER 844

Estimation of conidia production by individual pustules of Erysiphe graminis f. sp. tritici . . . . . G. SHANER 847

Changes in protein and isozyme content of apple fruits following infection by Monochaetia mali
R. NAIK and D. POWELL 851

Systemic movement of barley yellow dwarf virus in small grains . . . . . S. G. JENSEN 854

Effect of root-knot nematodes on Fusarium wilt of watermelon . . . . . D. R. SUMNER and A. W. JOHNSON 857

A strawberry fruit rot caused by Pestalotia longisetula . . . . . C. M. HOWARD and E. E. ALBREGTS 862

Leaf-streak of daylily: infection, disease development, and pathological histology . . . . . J. A. SPENCER 864

Evaluation of slow-mildewing resistance of Knox wheat in the field . . . . . G. SHANER 867

Protection of pear against fire blight by bacteria and bacterial sonicates J. L. MC INTYRE, J. KUĆ, and E. B. WILLIAMS 872

Inheritance of beet mosaic virus resistance in sugarbeet . . . . . R. T. LEWELLEN 877

Relationship between take-all of wheat and rhizosphere pH in soils fertilized with ammonium vs. nitrate-nitrogen
R. W. SMILEY and R. J. COOK 882

Distribution and metabolism of methyl 2-benzimidazolecarbamate, the fungitoxic derivative of benomyl, in strawberry plants . . . . . M. R. SIEGEL 890

A boll rot of cotton caused by Phytophthora parasitica . . . . . J. A. PINCKARD and G. F. GUIDROZ 896

Sporulation in Helminthosporium maydis: inhibition by thiamine . . . . . M. O. GARRAWAY 900

Anti-senescent compounds reduce injury and steroid changes in ozonated leaves and their chloroplasts
H. TOMLINSON and S. RICH 903

Host range and purification of the nucleic acid of a defective mutant of tobacco mosaic virus
R. B. BHALLA and O. P. SEHGAL 906

Studies on the reason for differential transmissibility of cauliflower mosaic virus isolates by aphids
M. C. Y. LUNG and T. P. PIRONE 910

Characterization of hypersensitivity in Capsicum annuum induced by the tomato strain of Xanthomonas vesicatoria
A. A. COOK 915

Squash mosaic virus variability: epidemiological consequences of differences in seed transmission frequency between strains . . . . . M. R. NELSON and H. K. KNUHTSEN 918

Squash mosaic virus variability: review and serological comparisons of six biotypes
M. R. NELSON and H. K. KNUHTSEN 920

Concentration and purification of clover yellow mosaic virus from pea roots and leaves . . . . . R. E. FORD 926

Helminthosporium turcicum lesion numbers related to numbers of trapped spores and fungicide sprays . R. D. BERGER 930

PHYTOPATHOLOGICAL NOTES

Location of Macrophomina phaseoli on soybean plants related to culture characteristics and virulence O. D. DHINGRA and J. B. SINCLAIR 934

Treatment of peanuts with dimethyl sulfoxide and its effect on aflatoxin production by Aspergillus flavus G. W. RAMBO and G. A. BEAN 936

A strawberry fruit rot caused by Alternaria tenuissima . . . . . C. M. HOWARD and E. E. ALBREGTS 938

Reduction of Macadamia nut set by Botrytis cinerea . . . . . J. E. HUNTER and R. K. KUNIMOTO 939

Inhibition of bacterial growth by extracts from potato tissues . . . . . J. C. ZALEWSKI and L. SEQUEIRA 942

Errata 944

No. 8 – AUGUST

A. W. Dimock, 1908-1972 . . . . . D. F. BATEMAN 945

P. E. Hoppe, 1896-1972 . . . . . E. W. HANSON and D. C. ARNY 946

Enzymes catalyzing anaplerotic carbon dioxide fixation in Verticillium albo-atrum . . R. E. HARTMAN and N. T. KEEN 947

Temperature effects upon development and pathogenicity of defoliating and nondefoliating pathotypes of Verticillium dahliae in leaves of cotton plants . . . . . S. H. TEMPLE, J. E. DEVAY, and L. L. FORRESTER 953

Systemic activity of methyl 2-benzimidazolecarbamate (MBC) in almond blossoms following prebloom sprays of benomyl + MBC . . . . . D. C. RAMSDELL and J. M. OGAWA 959

The interaction of Armillaria mellea and Trichoderma spp. as modified by methyl bromide H. D. OHR, D. E. MUNNECKE, and J. L. BRICKER 965

β-Glucosidase from Phoma strasseri and its possible role in a disease of peppermint . H. A. MELOUK and C. E. HORNER 973

Strains of peanut mottle virus . . . . . O. R. PAGUIO and C. W. KUHN 976

Epidemiology of Cercosporella footrot of wheat: spore production . . . . . R. C. ROWE and R. L. POWELSON 981

Epidemiology of Cercosporella footrot of wheat: disease spread . . . . . R. C. ROWE and R. L. POWELSON 984

Effect of mineral salts on Aphanomyces euteiches and Aphanomyces rootrot of peas . . . . . J. A. LEWIS 989

Criconemoides xenoplax experimentally associated with a disease of peach B. F. LOWNSBERY, H. ENGLISH, E. H. MOODY, and F. J. SHICK 994

Spatial distribution of cabbage black rot and the estimation of diseased plant populations . . . . . J. STRANDBERG 998

Effects of preparative procedures on the preservation of tobacco mosaic virus inclusions W. G. LANGENBERG and H. F. SCHROEDER 1003

Electron microscopy of soybean root nodules infected with soybean mosaic virus . . . . . J. C. TU 1011

The killer system in Ustilago maydis: heterokaryon transfer and loss of determinants P. R. DAY and S. L. ANAGNOSTAKIS 1017

Heterokaryon transfer of viruslike particles and a cytoplasmically inherited determinant in Ustilago maydis H. A. WOOD and R. F. BOZARTH 1019

Pod protection effects on soybean germination and infection with Diaporthe phaseolorum var. sojae and other microorganisms . . . . . K. L. ATHOW and F. A. LAVIOLETTE 1021

Colonization of host tissues and infectivity of Rhizoctonia solani . . . . . H. L. WARREN 1024

Natural biological control of oak wilt in Arkansas . . . . . F. H. TAINTER and W. D. GUBLER 1027

Histopathology of Pinus ponderosa ectomycorrhizae infected with a Meloidogyne species . . . . . J. W. RIFFLE 1034

Respiration of pea seeds (Pisum sativum) infected with Aspergillus ruber . . . . . G. E. HARMAN and R. E. DRURY 1040

Effect of tetracycline antibiotics on symptom development of stubborn disease and infectious variegation of citrus seedlings . . . . . E. C. K. IGWEGBE and E. C. CALAVAN 1044

Initial penetration process in powdery mildew infection of susceptible barley leaves W. E. MC KEEN and S. R. RIMMER 1049

Oxygen and carbon dioxide concentration effects on the growth and reproduction of Aphanomyces euteiches and certain other soil-borne plant pathogens . . . . . D. J. MITCHELL and J. E. MITCHELL 1053

Infection of Austrian and Ponderosa pines by Dothistroma pini in eastern Nebraska . . . . . G. W. PETERSON 1060

Quantitative assessment of the effect of the olive knot disease on olive yield and quality M. N. SCHROTH, J. W. OSGOOD, and T. D. MILLER 1064

Electron microscopy of unstable inclusions induced in maize by maize dwarf mosaic virus W. G. LANGENBERG and H. F. SCHROEDER 1066

PHYTOPATHOLOGICAL NOTES

Benomyl-induced growth of Ustilago striiformis in vitro . . . . . P. W. ROBINSON and C. F. HODGES 1074

Protection of apple and pear fruit tissue against fireblight with nonpathogenic bacteria J. A. WRATHER, J. KUĆ, and E. B. WILLIAMS 1075

The effect of tentoxin on stomatal aperture and potassium content of guard cells R. D. DURBIN, T. F. UCHYTIL, and L. SPARAPANO 1077

Transformation of fomes annosus—an unwarranted conclusion . . . . . F. ROLL-HANSEN and H. ROLL-HANSEN 1079

Piles of apple prunings as sources of conidia of Physalospora obtusa . . . P. M. MILLER and S. L. ANAGNOSTAKIS 1080

Aseptic zoospore production by Phytophthora fragariae . . . . . H. MUSSELL and F. FAY 1081

Enzymatically induced germination of oospores of Phytophthora megasperma M. A. SALVATORE, F. A. GRAY, and R. B. HINE 1083

Field control of a Ficus elastica leaf spot by proper potassium: magnesium nutrition R. B. MARLATT and P. G. ORTH 1084

Evidence for systemic movement of Erwinia rubrifasciens in Persian walnuts by the use of double-antibiotic markers J. M. GARDNER and C. I. KADO 1085

No. 9 – SEPTEMBER

Physiologic specialization of Septoria tritici . . . . . Z. EYAL, Z. AMIRI, and I. WAHL 1087

Systemic fungicidal effect of thiophanate methyl on Verticillium wilt of cotton and its transformation to methyl 2-benzimidazolecarbamate in cotton plants . . . . . H. BUCHENAUER, D. C. ERWIN, and N. T. KEEN 1091

Peroxidase activity in the developing cotton boll and its realtion to decay by Diplodia gossypina S. C. WANG and J. A. PINCKARD 1095

Reaction of cowpea seedlings to phytopathogenic bacteria . . . . . M. LAI and B. HASS 1099

Development of green mold in degreened oranges . . . . . G. E. BROWN 1104

Infectivity neutralization used in serological tests with partially purified beet curly top virus J. E. DUFFUS and A. H. GOLD 1107

Viruses from rusts and mildews . . . . . C. E. YARWOOD and E. HECHT-POINAR 1111

Activity of *o*-diphenol oxidase in postharvest apple decay by Penicillium expansum and Physalospora obtusa D. M. WILSON, G. J. NUOVO, and W. B. DARBY 1115

Electron microscopy of petunia vein-clearing virus, an isometric plant virus associated with specific inclusions in petunia cells . . . . . D. LESEMANN and R. CASPER 1118

Infection of isolated plant protoplasts with potato virus X . . . . . T. A. SHALLA and L. J. PETERSEN 1125

Inheritance of resistance to the pea seed-borne mosaic virus . . . . . .D. J. HAGEDORN and E. T. GRITTON 1130

The distribution and electron microscopy of viruses of cacti in southern Arizona
G. M. MILBRATH, M. R. NELSON, and R. E. WHEELER 1133

Evidence that clover club leaf is caused by a rickettsia-like organism . . . . . .I. M. WINDSOR and L. M. BLACK 1139

Characterization of the cytoplasmic ribosomes and ribosomal RNA from mycelium of various species of Phytophthora
J. V. LEARY, J. R. ROHEIM, and G. A. ZENTMYER 1148

Early Botrytis rot of grapes: time of infection and latency of Botrytis cinerea Pers. in Vitis vinifera L
W. D. MC CLELLAN and W. B. HEWITT 1151

Germination of Phyllosticta maydis conidia in an incubation chamber with control of high relative humidities
A. BOOTSMA, T. J. GILLESPIE, and J. C. SUTTON 1157

Early blight of celery: analysis of disease spread in Florida . . . . . .R. D. BERGER 1161

Infiltration and translocation of thiabendazole in apple trees by means of a pressure injection technique
Y. PINKAS, E. SHABI, Z. SOLEL, and A. COHEN 1166

Development of Phytophthora megasperma var. sojae in soybean roots . . . . . .R. L. SLUSHER and J. B. SINCLAIR 1168

Stage specificity in streptomycin action against some plant pathogenic Peronosporales . . . . Y. COHEN and M. PERL 1172

Spore germination of Diplodia gossypina in the presence of carbohydrates and phenolic compounds in relation to boll rot of cotton . . . . . .S. C. WANG and J. A. PINCKARD 1181

A screening technique useful in selecting for resistance in alfalfa to Phytophthora megasperma
F. A. GRAY, R. B. HINE, M. H. SCHONHORST, and J. D. NAIK 1185

Genetic control of dodine tolerance in Venturia inaequalis . . . . . F. J. POLACH 1189

Internal rib necrosis and rusty brown discoloration of 'Climax' lettuce induced by lettuce mosaic virus
S. M. COAKLEY, R. N. CAMPBELL, and K. A. KIMBLE 1191

Quantitative detection of propagules of Cephalosporium gramineum in soil . . M. V. WIESE and A. V. RAVENSCROFT 1198

PHYTOPATHOLOGICAL NOTES

Effect of nitrogenous fertilizer on biochemical processes that could affect lesion size of rice blast
N. MATSUYAMA and A. E. DIMOND 1202

Increased leaf exudation enhances Curvularia leaf spot severity in virus-infected gladiolus . . . . . .M. K. BEUTE 1204

A microsyringe method for determining concentration of fungal propagules
W. H. KO, L. L. CHASE, and R. K. KUNIMOTO 1206

Reducing the spread of aphid-transmitted viruses in peppers by trapping the aphids on sticky yellow polyethylene sheets . . . . . S. COHEN and S. MARCO 1207

Extraction of the curly top agent from segmented petioles of beet . . . . .K. IZADPANAH and R. J. SHEPHERD 1209

Inheritance of tolerance to a pepper virus in Florida . . . . . T. A. ZITTER and A. A. COOK 1211

Errata 1212

No. 10 – OCTOBER

Aaron Guy Johnson, 1880-1973 . . . . . A. L. ROBERT and J. A. STEVENSON 1213

Abstracts of the Fifty-Seventh Annual Meeting of the Pacific Division of The American Phytopathological Society . . . 1214

Influence of inoculum composition on the black point disease of durum wheat . .J. E. HUGUELET and R. L. KIESLING 1220

Postinfectional fungus inhibitors from plants: fungal oxidation of capsidiol in pepper fruit
A. STOESSL, C. H. UNWIN, and E. W. B. WARD 1225

Symptomatology, etiology, and histopathology of Botrytis brown stain of onion . . C. A. CLARK and J. W. LORBEER 1231

2-Thiouracil-induced changes in alfalfa mosaic virus infectivity and nucleoprotein components in hypersensitive bean
C. W. KUHN 1235

Benomyl for practical control of Dutch elm disease
E. B. SMALLEY, C. J. MEYERS, R. N. JOHNSON, B. C. FLUKE, and R. VIEAU 1239

The removal of Helminthosporium maydis spores by wind . . . . . P. E. WAGGONER 1252

Fusarium wilt of chrysanthemum: complete control of symptoms with an integrated fungicide-lime-nitrate regime
A. W. ENGELHARD and S. S. WOLTZ 1256

Serotypes of Xanthomonas vesicatoria unrelated to its pathotypes
R. CHARUDATTAN, R. E. STALL, and D. L. BATCHELOR 1260

A vacuum injection method for quantitative leaf inoculation of Poa pratensis with Helminthosporium sorokinianum
C. F. HODGES 1265

Interplot interference in field experiments with late blight of potato (Phytophthora infestans)
W. C. JAMES, C. S. SHIH, L. C. CALLBECK, and W. A. HODGSON 1269

The ultrastructure of a rickettsialike organism from a peach tree affected with phony disease
G. NYLAND, A. C. GOHEEN, S. K. LOWE, and H. C. KIRKPATRICK 1275

Relationships of Xanthomonas pruni bacteriophages to bacterial spot disease in Prunus . . . . . E. L. CIVEROLO 1279

The fruit pox and gold fleck syndromes of tomato . . . . P. CRILL, D. S. BURGIS, J. P. JONES, and J. W. STROBEL 1285

Prevalence and pathogenicity to corn of Fusarium species from corn roots, rhizosphere, residues, and soil
H. L. WARREN and T. KOMMEDAHL 1288

Translocation of tobacco ringspot virus in soybean . . . . . E. L. HALK and J. M. MC GUIRE 1291

Sugarcane mosaic virus and maize dwarf mosaic virus in mixed infections of sugarcane and other grasses
A. G. GILLASPIE, JR. and H. KOIKE 1300

Reduced infectability and inoculum production as factors of slow mildewing in Knox wheat . . . . . G. SHANER 1307

Maize dwarf mosaic virus replication in pigment-deficient mutants of corn
D. E. MAYHEW, R. E. FORD, and D. S. ROBERTSON 1311

Plantago mottle virus, a new member of the tymovirus group . . . . . A. L. GRANETT 1313

Selective virus transmission by Rhopalosiphum padi exposed sequentially to two barley yellow dwarf viruses
W. R. ROCHOW 1317

Erratum 1322

No. 11 – NOVEMBER

Wendell H. Tisdale, 1892-1973 . . . . . .T. C. RYKER 1323

Letter to the Editor: some principles of plant pathology. II. . . . . C. E. YARWOOD 1324

Letter to the Editor: endogenous inhibitors of spore germination . . . . . D. GOTTLIEB 1326

Letter to the Editor: virus terminology and the viroid: a rebuttal . . . . . T. O. DIENER 1328

Use of mobile nurseries in pathogenicity studies of Erysiphe graminis hordei on Hordeum spontaneum
Z. EYAL, R. YURMAN, J. G. MOSEMAN, and I. WAHL 1330

Longevity of mycelium of Colletotrichum lindemuthianum in hypocotyl tissue of resistant and susceptible bean cultivars
K. ERB, M. E. GALLEGLY, and J. G. LEACH 1334

Stalk rot of corn caused by Helminthosporium rostratum . . . . . T. A. KUCHAREK 1336

Quantitative changes in structural components of conifer woods during decay by white- and brown-rot fungi
T. K. KIRK and T. L. HIGHLEY 1338

Tobacco mosaic virus: can aphids inoculate it into plants with their mouthparts?. .K. F. HARRIS and R. H. E. BRADLEY 1343

Partial purification of the pea seed-borne mosaic virus . . . . . W. R. STEVENSON and D. J. HAGEDORN 1346

Effect of methyl bromide or carbon disulfide on Armillaria and Trichoderma growing on agar medium and relation to survival of Armillaria in soil following fumigation . . . D. E. MUNNECKE, M. J. KOLBEZEN, and W. D. WILBUR 1352

Host specificity of a toxin from Phyllosticta maydis for Texas cytoplasmically male-sterile maize
J. C. COMSTOCK, C. A. MARTINSON, and B. G. GENGENBACH 1357

A selective toxin produced by Phyllosticta maydis . . . . . .O. C. YODER 1361

A benzimidazole-resistant strain of Erysiphe graminis . . . . . J. M. VARGAS, JR. 1366

Occurrence and severity of Verticillium disease of mushrooms produced on casing (soil) treated with aerated steam
R. K. MOORE and P. J. WUEST 1368

Conditions affecting the detection of Phytophthora megasperma in soils of Wisconsin alfalfa fields
R. G. PRATT and J. E. MITCHELL 1374

Multiplication and pathogenesis of cowpea chlorotic mottle virus and southern bean mosaic virus in single and double infections in cowpea . . . . . C. W. KUHN and W. O. DAWSON 1380

Purification of maize dwarf mosaic virus by continuous-flow centrifugation . . . .D. T. GORDON and R. E. GINGERY 1386

Inhibition of Helminthosporium turcicum spore germination by leaf diffusates from northern leaf blight-susceptible or -resistant corn . . . . . M. E. MACE and J. A. VEECH 1393

A leaf spot disease of highbush blueberry caused by Alternaria tenuissima . . . . . R. D. MILHOLLAND 1395

Isolation and characterization of a bacteriophage for the identification of Corynebacterium michiganense
E. ECHANDI and M. SUN 1398

Root-infecting species of Fusarium in soil and in the roots, rhizospheres, and residues of oats
H. L. WARREN and T. KOMMEDAHL 1401

Induction of stem pitting in peaches by mechanical inoculation with tomato ringspot virus
S. H. SMITH, R. F. STOUFFER, and D. M. SOULEN 1404

African cereal streak, a new disease of cereals in East Africa . . . . . D. E. HARDER and W. BAKKER 1407

Effects of three nematicides on the physiology of rose infected with Meloidogyne hapla . .E. EPSTEIN and B. BRAVDO 1411

Suppression of oxidant injury on beans by systemic fungicides . . . . . .W. J. MANNING and P. M. VARDARO 1415

Wind-blown soil in the epidemiology of bacterial leaf spot of alfalfa and common blight of bean
L. E. CLAFLIN, D. L. STUTEVILLE, and D. V. ARMBRUST 1417

PHYTOPATHOLOGICAL NOTES

Scanning electron microscopy of Pinus monticola bark infected with Cronartium ribicola
B. L. WELCH and N. E. MARTIN 1420

Occurrence of a rickettsia-like bacterium in the xylem of peach trees with phony disease
D. L. HOPKINS, H. H. MOLLENHAUER, and W. J. FRENCH 1422

Conidiophores and basidiocarps of Fomes annosus on pines in east central Alabama . W. D. KELLEY and T. C. DAVIS 1424

A selective medium for, and a definitive colony characteristic of, Erwinia amylovora
J. E. CROSSE and R. N. GOODMAN 1425

Leaf necrosis of roadside sugar maple in Ontario in relation to elemental composition of soil and leaves
R. HALL, G. HOFSTRA, and G. P. LUMIS 1426

Efficacy of dodine and glyodin as foliar protectants for control of tobacco mosaic virus
H. S. CHOW and E. M. RODGERS 1428

Transmission of satellite of tobacco ringspot virus by Xiphinema americanum
J. M. MC GUIRE and I. R. SCHNEIDER 1429

Stimulatory effect of pollen and pistillate parts of some horticultural species upon the germination of Botrytis cinerea spores . . . . . H. BORECKA and D. F. MILLIKAN 1431
